The Funds file their complete schedules of investments with the Securities and Exchange Commission ("SEC") for the first and third quarters of each fiscal year as an exhibit to its reports on Form N-PORT. The Funds' Form N-PORT is available on the SEC's website at https://www.sec.gov, and may be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to fund securities, as well as information relating to how the Funds voted proxies relating to fund securities during the most recent 12-month period ended June 30, is available (i) without charge, upon request, by calling 1-844-523-8637; and (ii) on the SEC's website at https://www.sec.gov.

LETTER TO SHAREHOLDERS (Unaudited)

Dear Fellow Shareholders:

Knights of Columbus Asset Advisors, LLC is pleased to present this annual report for Knights of Columbus Funds for the fiscal year ending October 31, 2023. The market has been focused on issues related to both inflation and wages. In October 2022, CPI was 7.7% on an annualized basis and stood at 3.7% as of the last reading on September 30, 2023. The Fed has aggressively increased the Federal Funds rate in an effort to thwart inflation. Because of the tremendous stimulus that was provided during COVID-19, consumers had built ample savings and once the lockdowns ended, there has been significant consumer spending. The increased consumer spending for goods was met with the still-recovering supply chain and caused prices for many goods to increase. Further, tremendous demand for travel also saw prices for leisure activities increase as well.

On the wage front, Average Hourly Earnings were growing at an annualized rate of 4.9% in October 2022 and this has fallen to an annualized rate of 4.1% as of October 2023. The Federal Reserve has operated with a twin mandate of full employment and low inflation, and many are looking to see which part of the mandate they will favor. If employment, wages, and spending remain strong, it is hard to see how inflation will not increase. If the Fed focuses on increasing interest rates to stave off inflation, aggregate employment will likely be negatively impacted. Overall, it seems that the Fed is most focused on taming inflation in order to provide a strong basis for future economic growth.

Over the trailing twelve months, the equity markets saw very mixed results with the Russell 1000 Growth returning 18.95%, the Russell 1000 Value returning 0.13%, the Russell 2000 returning -8.56%, and the FTSE All-World ex-U.S. Index returning 12.72%. The bond market has been very weak due to rising rates and widening spreads in the Bloomberg Aggregate Index returned 0.36%, representing core fixed income results, and the Bloomberg 1-3 Year Government/Credit Index returned 3.23%, representing short-duration fixed income.

During the twelve months that ended October 31, 2023, the stock market was bifurcated between the largest growth and technology stocks that performed exceptionally well and then there was the rest of the market. For example, for the one year ending October 31, 2023, Apple returned 12.0%, Amazon returned 29.9%, Microsoft returned 47.1%, Google's two share classes returned 32.4% and 31.3% respectively, NVIDIA returned 202.3% and Meta (formerly Facebook) returned 223.4%. Investors who were not focused on these stocks missed most of the return and if one looks at the disparity between Growth and Value, you can really discern how bifurcated the market truly was last year.

Through the end of the third quarter of 2023, Gross Domestic Product ("GDP") rose by 2.9% on a year-over-year basis (or more specifically from third quarter 2022 results). The continued growth in the economy, coupled with strong employment and wages, are the factors that are keeping the Fed vigilant about inflation. We are seeing some impact of the Fed rate hiking activity as Industrial Production is up only 0.01% year over year. However, orders for Durable Goods are up 4.3% over the same period and Capacity Utilization also remains strong. All indications are the excess savings that consumers accumulated due to Covid stimulus are all but exhausted and this is one factor the Fed and the market are watching to see if economic activity slows enough to slow inflation and cause the Fed to halt the rate hiking cycle.

There can be no discussion of economics without a nod to the ongoing conflict in Ukraine and the recent actions that Israel has taken as a result of Hamas' incursion and attacks on innocent Israeli citizens. The world is watching and thus far, the economic impacts have been small and have not upset the global economy. While we believe the spillover effects from both of these conflicts to create a much larger regional or even global conflict is low, the probability is not zero. We are diligently monitoring these global events and may adjust portfolios as events evolve.

KoCAA is very thankful for our shareholder base which continues to grow, and our fund family remains above \$1.2 billion in total assets, and we continue to enjoy strong cash inflows. We look forward to an even more successful fiscal year in 2024, particularly as KOCAA's Investment Advisor Representative ("IAR") program grows with more participants. To augment our registered representatives in the fields, KOCAA is building an internal sales team and we are also expanding our marketing efforts beyond our core membership to the greater Catholic community. The nine proprietary funds included in the IAR program currently represent the broadest array of Catholic funds offered by any single provider. We are proud of what we have built and continue to work hard for our shareholders every day.

As always, we appreciate your confidence in our team and look forward to serving you in the future.

Sincerely,

Anthony V. Minopoli

President & Chief Investment Officer

The information provided herein represents the opinion of the manager at a specific point in time and is not intended to be a forecast of future events, a guarantee of future results nor investment advice.

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost and

current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-844-KC-FUNDS or visit www.kofcassetadvisors.org.

Mutual fund investing involves risk. Some mutual funds have more risk than others. The investment return and principal value will fluctuate and shares when sold may be worth more or less than the original cost. Fixed income investments are subject to interest rate risk, and their value will decline as interest rates rise. Asset allocation and diversification do not assure a profit or protect against loss in declining markets. There is no guarantee a fund's objectives will be achieved. The risks associated with each fund are explained more fully in each fund's respective prospectus. Investors should consult with their attorney, accountant, and/or tax professional for advice concerning their particular situation.

Definitions of Comparative Indices

Bloomberg US Aggregate Bond Index

The Bloomberg US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS (agency and non-agency). Provided the necessary inclusion rules are met, US Aggregate eligible securities also contribute to the multi-currency Global Aggregate Index and the US Universal Index, which includes high yield and emerging markets debt. The US Aggregate Bond Index was created in 1986.

Bloomberg 1-3 Year US Government/Credit Index

The Bloomberg US Government/Credit Index is the non-securitized component of the US Aggregate Index and was the first macro index launched by Capital. The US Government/Credit Index includes Treasuries (i.e., public obligations of the US Treasury that have remaining maturities of more than one year), government-related issues (i.e., agency, sovereign, supranational, and local authority debt), and corporates. The US Government/Credit Index was launched on January 1, 1979 and is a subset of the US Aggregate Index. The 1-3 year index includes all medium and larger issues of US government, investment-grade corporate, and investment-grade international dollar-denominated bonds that have maturities of between 1 and 3 years and are publicly issued.

Russell 1000® Growth Index

The Russell 1000® Growth Index measures the performance of the large-cap growth segment of the US equity universe. It includes those Russell 1000® companies with higher price-to-book ratios and higher forecasted growth values. The Russell 1000® Growth Index is constructed to provide a comprehensive and unbiased barometer for the large-cap growth segment. The Russell 1000® Growth Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics.

Russell 1000® Value Index

The Russell 1000® Value Index measures the performance of the large-cap value segment of the US equity universe. It includes those Russell 1000® companies with lower price-to-book ratios and lower expected growth values. The Russell 1000® Value Index is constructed to provide a comprehensive and unbiased barometer for the large-cap value segment. The Russell 1000® Value Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect value characteristics.

Russell 2000® Index

The Russell 2000® Index measures the performance of the small-cap segment of the US equity universe. The Russell 2000® Index is a subset of the Russell 3000® Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. The Russell 2000® Index is constructed to provide a comprehensive and unbiased small-cap barometer and is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set.

FTSE All-World ex-US Index

The FTSE All-World ex-US Index is one of a number of indexes designed to help investors benchmark their international investments. The index comprises Large and Mid-cap stocks providing coverage of Developed and Emerging Markets excluding the US. The index is derived from the FTSE Global Equity Index Series (GEIS), which covers 98% of the world's investable market capitalization.

S&P 500 Index

The S&P 500 Index is an unmanaged capitalization-weighted index of 500 stocks designed to measure performance of the broad domestic stock market through changes in the aggregate market value of 500 stocks representing all major industries.

FTSE Nareit Equity REITs Index

FTSE Nareit Equity REITs Index contains all Equity REITs not designated as Timber REITs or Infrastructure REITs. Prior to December 2010, the index included Timber REITs and Infrastructure REITs.

Knights of Columbus U.S. All Cap Index

Adheres to the United States Conference of Catholic Bishops' Socially Responsible Investment Guidelines ("USCCB Guidelines"). The Knights of Columbus U.S. All Cap Index consists of all common stocks and real estate investment trusts in the Solactive US Broad Market Index excluding companies that are determined by Institutional Shareholder Services to be involved with enterprises that conflict with the USCCB Guidelines. The Market Index includes the 3,000 U.S. companies with the largest free-float market capitalizations.

HFRX Equity Market Neutral Index

The HFRX Equity Market Neutral Index employs sophisticated quantitative techniques of analyzing price data to ascertain information about future price movement and relationships between securities, select securities for purchase and sale. These can include both Factor-based and Statistical Arbitrage/Trading Strategies.

EBITDA

EBITDA is a statistic used to assess a company's operating performance. It is a proxy for the cash flow generated by its complete operations.

Knights of Columbus Limited Duration Fund

The Bloomberg 1-3 Year US Government/Credit Index (USD) returned 3.23% for the year ended October 31, 2023. Most sectors outperformed as interest rate increases by the Federal Reserve were well-telegraphed, the economy and stock market performed better than expected, and demand for higher-yielding investment-grade credit improved. All spread products outperformed the index, which averaged 66.2% of its portfolio in Treasuries.

The Knights of Columbus Limited Duration Fund, I Shares, returned 3.46% for the year, ahead of the benchmark by 23 basis points. The primary driver of the portfolio outperformance for the year ended October 31, 2023, was our continued overweight allocation to spread product, although we have reduced risk to reflect our more pessimistic view of the economy. Within our allocations, the largest contributors to performance were the fund's overweight to the Asset-Backed and Industrial sectors. This was the result of overall risk sentiment improving in the capital markets. Security selection in our Industrial portfolio also contributed to outperformance versus the Index. Providing some offset to this was the fund's security selection in the Financials sector, which underperformed the index's Financials return.

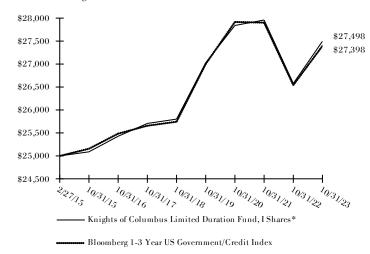

The Fed has been focused on reducing inflation and has made material progress as the consumer price index fell from 8.2% a year ago to 3.7% in September 2023. With interest rates higher (the 10-year Treasury recently reached 5% for the first time in over a decade), the market is tightening financial conditions itself, allowing the Fed to keep the Fed Funds rate unchanged at its last meeting at 5.25-5.5%. Strong GDP growth and benign employment conflict with the unprecedented quick rise in rates over the last several quarters, although the lag from the rate rise may be ending and economic weakness may be forthcoming. Although the Fed has said it could raise rates again in response to higher inflation data, the market is betting that rates have peaked. The Fed has stated that it intends to keep rates higher for longer to subdue any lingering inflation, but the market forecasts cuts in 2024. In this volatile economic and rate environment, coupled with heightened geopolitical developments, we believe caution is warranted and security selection critical.

| Index*** | 3.23% | -0.62% | 1.25% | 1.06% |

Comparison of Change in the Value of a \$25,000 Investment in the Knights of Columbus Limited Duration Fund, I Shares versus the Bloomberg 1-3 Year US Government/Credit Index.

- * Commenced operations on February 27, 2015. The graph is based on I Shares only; performance for Class S Shares would have been lower due to differences in fee structures.
- ** Commenced operations on July 14, 2015.
- *** Index returns are shown from February 27, 2015. See definition of comparative index on page 3.
- † If the Adviser had not waived a portion of its fee, the Fund's total return may have been lower.
- ‡ See Note 1 in the Notes to Financial Statements.
- ¹ The performance data quoted herein represents past performance and the return and value of an investment in the Fund will fluctuate so that, when redeemed, may be worth less than its original cost. The Fund's performance assumes the reinvestment of dividends and capital gains. Index returns assume reinvestment of dividends and, unlike a Fund's returns, do not reflect any fees or expenses. If such fees and expenses were included in the index returns, the performance would have been lower. Please note that one cannot invest directly in an unmanaged index. There are no assurances that the Fund will meet its stated objectives. The Fund's holdings and allocations are subject to change because it is actively managed and should not be considered recommendations to buy individual securities.
- 2 Returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund Shares.

Knights of Columbus Core Bond Fund

The Bloomberg U.S. Aggregate Index (USD) returned 0.36% for the year ended October 31, 2023. Most sectors outperformed as investors continued to be constructive on risk as the Federal Reserve (Fed) neared the end of its hiking cycle. CMBS was the worst-performing sector in the Index.

The Knights of Columbus Core Bond Fund, I Shares, returned 0.04% for the year, lagging the benchmark. The primary driver of the portfolio underperformance for the year ended October 31, 2023, was security selection within the Financials sector during the banking crisis in March 2023. Additionally, the Fund was also slightly underweight Industrial credit, which drove underperformance as spread product performed well. Providing some offset to this was the Fund's positioning in securitized products, which drove outperformance across ABS, CMBS, and MBS

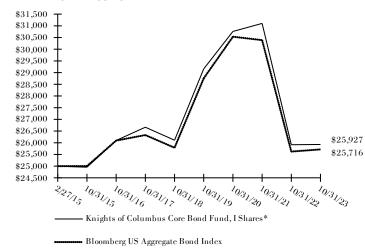

We were likely early in our shift to more conservative positioning within the Fund and underestimated the timing of the lag effects from restrictive Fed policy. That being said, we do not feel that our risk-averse stance is misplaced given the current conditions. The Fed appears content to hold policy rates at restrictive levels while continuing balance sheet roll-off, the Treasury markets are facing massive amounts of supply from continued large deficit spending, consumer stress continues to develop up the income quintiles, and there remains significant concerns about refinancing issues in the commercial property and high yield/loan markets. We anticipate that the ebullient markets will have to come to terms with the macroeconomic realities eventually, at which point, we can deploy our dry powder into risk assets we know and like.

Knights of Columbus Long/Short Equity Fund

The benchmark HFRX Equity Market Neutral Index rose 3.18% from October 31st, 2022 through October 31st, 2023. The Knights of Columbus Long/Short Equity Fund rose, I shares, 1.52% on a net basis over the same period.

L2's study of the creation and collapse of bubbles made the following items clear:

- 1. Bubbles are a normal part of the capital cycle
- 2. Estimating the time and magnitude of a bubble is futile
- When bubbles inevitably collapse, temporary reversals and "counter-trend" rallies are normal

At the start of the year, KCEIX had experienced two consecutive years of strong returns as a collection of different bubbles began to deflate and investors' attention began to return to fundamentals and valuation. Interestingly, the compression in spreads observed over the prior two years merely moved valuations from all-time records back to levels slightly below those seen at the peak of the dot.com bubble.

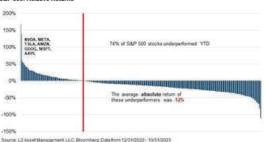

However, mindful of the propensity for bubbles to create investor whiplash, the Fund's factor exposures going into the year were more modest than in 2021 or much of 2022. Consistent with interim reversals observed in the past, this year we witnessed sharp rallies in speculative low-quality stocks as well as a highly concentrated rally in a select few mega-cap stocks that became the principal drivers of the "AI bubble." Again, the resurgence in speculative behavior has moved value spreads back to dot.com highs.

While this has hindered results year-to-date, we believe the current disconnect between prices and fundamentals leave the Fund well-positioned to capitalize on what the data suggests is a generational opportunity for market neutral strategies like the one employed in KCEIX.

The chart below shows the distribution of relative returns in the S&P500. The bars to the left of the red line are the number of stocks in the S&P 500 that outperformed. The bigger the bar, the bigger the outperformance. The bars to the right are the number of stocks that underperformed. Each bar shows the extent of their out/underperformance relative to the S&P 500.

Our research has documented that over the last 40 years, the percentage of stocks that outperform the index on a rolling 12 month basis is typically about 50%. Half the stocks beat the index and half lose. At the peak of the dot.com bubble, only 20% of the stocks in the S&P 500 managed to outperform. And that was because the returns for the index came from a handful of large high-flying stocks.

We see a similar pattern today. 74% of the stocks in the index have underperformed through the end of October. Even more incredible is the magnitude of underperformance. As we highlight in the chart above, the average absolute return of the stocks that make up those 74% is -12%. This is in a market that is up nearly 11%.

Another way to think about it is the 15 largest contributors to the S&P 500's returns created a 12.5% contribution to the index's returns. Yet the index was up only 10.7%. So, in aggregate the remaining 485 stocks detracted from returns. This reflects a skewness in returns that has been rarely seen before.

This happened once before in the dot.com bubble and it did not end well. We have no reason to believe that it will be different this time. Just a gentle and warm reminder to our friends: there are claims that software in general, and AI in particular, is going to eat the world. Maybe these new-economy pundits are right. But we would simply highlight that while software may indeed eat the world, we cannot eat Artificial Intelligence or software! In the meantime, these stocks are being priced to perfection.

The mathematically and economically impaired are having their day in the sun. We hope they are enjoying there moment in the sun because no matter what rates do, a tremendous pain trade is coming for overpriced blue chip AI stocks, low quality speculative stocks and the trillions of dollars in equity that is now attached to stocks that are effectively insolvent.

For us this looks like we have yet another opportunity like the one seen in 2020. Even with a net of barely 20% and gross exposure of just 110% we put up high single to double digit returns even in the sharp market correction of 2022. As always, our process is a wager on financial history, capitalism, and arithmetic. We like our odds.

Knights of Columbus Large Cap Value Fund

The Russell 1000® Value Index rose 0.13% for the year ended October 31, 2023. The index peaked in July and slid lower for the next three months. Four sectors had positive returns, with Communication Services the clear winner, finishing higher by 30.38% followed by Information Technology, higher by 8.91%. Seven sectors had negative returns with Health Care and Real Estate the weakest, falling -10.06% and -8.02%, respectively.

The Fund returned 3.30% during this time frame. The Utilities sector helped performance. Vistra Corp. (VST, 1.4% Avg. Wgt., +46.83% Return) rose 46.83%. The company had several strong earnings reports and by the beginning of 2023, had the majority of their generation hedged for 2023-2025. The company also announced the acquisition of Energy Harbor Corp. as a key step toward its transition to clean energy. Constellation Energy Corp. (CEG, 1.0%, +20.73%) also posted strong earnings as its carbon-free energy portfolio continued to gain traction.

The Materials sector detracted from value due mainly to stock selection. The Mosaic Company (MOS, 0.8%, -34.67%) finished down -34.67%. Their stock price largely follows the spot price of potash which has been falling since the early 2022 peak on Russia's invasion of Ukraine. Sealed Air Corp. (SEE, 0.8%, -11.79%) also detracted value. The company had weak earnings reports driven by declining volumes and they lowered full-year guidance.

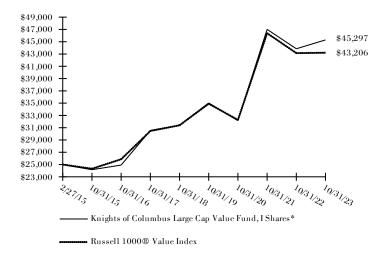

Investors appeared to finally believe the Federal Reserve's mantra of "higher for longer" interest rates during the last quarter, sending broad indexes lower and setting the first (potential) cracks in market leadership from the mega-cap growth companies. Calendar year 2024 earnings expectations, the level and rate of change of long-term interest rates, and broad macroeconomic conditions will be the primary determinants of performance moving forward. With an eye towards increasing geopolitical tensions, we enter the next quarter positioned with a slight defensive tilt and tight risk controls as earnings season winds down and calendar year-end approaches.

Knights of Columbus Large Cap Growth Fund

Fiscal year 2023 generated strong returns for the large-cap growth benchmark. The Russell 1000° Growth Index bottomed in October of 2022, after enduring a brutal decline over the first three quarters of 2022, to generate strong index-level returns of +18.95%. The new year brought new vigor for growth investors, spurred in large part by excitement over artificial intelligence and the earnings resilience and growth prospects of the megacap growth behemoths Apple Inc., Microsoft Corporation, Alphabet Inc., NVIDIA Corporation, Meta Platforms Inc., and Amazon.com, Inc. Despite the strong top-line performance index returns were highly concentrated Microsoft (+47.1%), NVIDIA (+202.3%), Apple (+12.0%), Amazon.com (+29.9%) and Alphabet (+31.89%) combined to produce 68% of the index's return.

The Fund gained 16.63% for the fiscal year, trailing the benchmark by 232 basis points. Catholic restrictions played a notable role in relative performance during the year, as several larger index members were restricted and generated notable returns. Two of the more notable impacts were from Amazon.com, Inc. (AMZN, 5.02% Avg Wgt in the benchmark) and Eli Lilly and Company (LLY, 1.37% Avg Wgt, +52.6% Return). The two collectively contributed 223 bps of the benchmark's return, accounting for almost all of the Fund's underperformance. A larger-than-average cash position also hurt as the market rallied.

After accounting for Catholic restrictions and cash, the portfolio performed quite well. Stock selection was positive overall and generated positive attribution in seven of eleven sectors. Relative performance in Health Care was favorable, with double-digit gains in Steris PLC (STE, 1.0%, +22.8%), Boston Scientific Corporation (BSX, 1.0%, +18.4%), and Cencora, Inc. (formerly AmerisourceBergen, COR, 1.0%, +11.5%). Real Estate also helped, led by a 22.2% gain in record storage REIT Iron Mountain Incorporated (IRM, 1.4%, +22.2%).

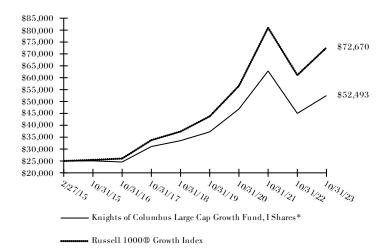

Investors appeared to finally believe the Federal Reserve's mantra of "higher for longer" interest rates during the quarter, sending broad indexes lower and setting the first (potential) cracks in market leadership from the mega-cap growth companies. Calendar year 2024 earnings expectations, the level and rate of change of long-term interest rates, and broad macroeconomic conditions will be the primary determinants of performance moving forward. With an eye towards increasing geopolitical tensions, we enter the next quarter positioned with a slight defensive tilt and tight risk controls as earnings season winds down and year-end approaches.

Knights of Columbus Small Cap Fund

The fiscal year 2023 was a roller coaster of a ride for small caps—in comparison with better, albeit narrow, the performance of the large-cap indexes. The Russell 2000® Index traded in a volatile range for much of the year, returning -8.56%, but traded poorly from the recent market peak at the end of July through the fiscal year end as the sharp move higher in rates over the summer and early fall weighed. There were two sharp rallies in the fiscal year—the strong +9.75% January move higher led by Communication Services and Consumer Discretionary as rates moved lower throughout the month, as well as the +14.74% move in June and July led by Energy and Financials as oil prices rose and the March regional banking crisis concerns eased. Despite these rallies, the -16.69% move lower in the fiscal fourth quarter brought the Russell 2000® Index returns into negative territory for the fiscal year and below the 2022 lows.

The Fund was down -12.04% during the fiscal fourth quarter, outperforming the benchmark by 465 basis points (bps). In fiscal year 2023, the Fund was down -2.58%, outperforming the benchmark by 598 basis points. Since inception on 2/27/2015, the Fund returned 4.56%, underperforming the benchmark return of 4.91% by 68 basis points.

The Healthcare sector was the second largest sector in the Russell 2000° Index during the fiscal year, and despite being the worst-performing sector in the benchmark, it accounted for the largest area of outperformance for the Fund due to selection and allocation. Vericel Corporation (VCEL, 1.2% Avg. Wgt.), Insmed Inc. (INSM, 0.7%), and NextGen Healthcare Inc. (NXGN, 0.9%) were the biggest contributors to this outperformance, with holding-period returns of +31%, +45%, and +19%, respectively. Conversely, the Utilities sector was the biggest detractor of relative performance as Clearway Energy Inc. (CWEN, 1.4%) generated a holding period return of -34%.

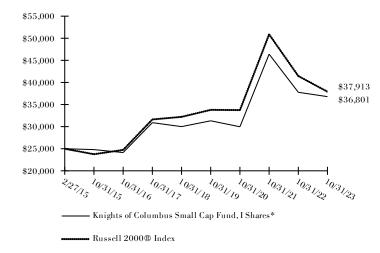

Investors appeared to finally believe the Federal Reserve's mantra of "higher for longer" interest rates during the fiscal fourth quarter. Calendar year 2024 earnings guidance, the level and rate of change of long-term interest rates, and broad macroeconomic conditions will be the primary determinants of performance moving forward. We enter the fiscal year 2024 positioned with a slight defensive tilt and tight risk controls as we await the coming earnings season for greater insight into future performance.

Knights of Columbus Real Estate Fund

U.S. Real estate stocks posted a loss for the period between November 1, 2022 and October 31, 2023, with macroeconomic uncertainty exacerbated by geopolitical tension driving a sell-off in risk assets, including listed real estate shares. The FTSE Nareit Equity REITs Index (the "Index") had a total return of -6.10%, while the Knights of Columbus Real Estate Fund (the "Fund") generated a total net return of -8.90%, underperforming the Index by 280 basis points.

During the year, despite continued strong industry fundamentals, the REIT market was weighed down by exogenous factors, including:

- Central bank tightening to rein in elevated inflation and its potential impact on consumer confidence and the economy;
- Concerns over the pace/timing of stimulus withdrawal and rate hikes by the U.S. Fed;
- · Geopolitical stress driven by the war in Ukraine;
- War in the Middle East caused a flight to safe havens that exerted downward pressure on Treasury bond yields;
- China's muted recovery as it seeks to transition from COVID lock-downs to re-opening its economy;
- Regional bank stress revealed the lagged effect of rate hikes to date—with the resulting tightening of credit doing some of the Fed's work for it; and
- The looming risk of a shut-down of the U.S. government (Deadline extended to early 2024)

A historical review of listed real estate returns during periods of rising inflation serves as a reminder that real estate values tend to increase with inflation, as rising inflation is typically an indicator of a growing economy – the most important driver of demand for most property types. Additionally, commercial real estate leases often incorporate annual rent escalators, helping to provide additional protection of real estate cash flows during inflationary periods.

The Fund's stock selection in the Cold Storage sector was a contributor to relative returns vs. the benchmark. The Fund also benefited from its stock selection in the Diversified, Net Lease, Lodging, and certain Specialty sectors.

The Fund's stock selection in the Retail, Residential, Healthcare, and certain Specialty sectors were detractors to relative returns. We believe that the sell-off in Specialty property types with strong fundamentals, such as Data Centers and Cell Towers, has presented deep value investment opportunities for the Fund.

Despite the macroeconomic and geopolitical headlines, our outlook for the real estate industry continues to be constructive. Real estate fundamentals and earnings growth remain strong amidst an environment characterized by low supply in many sectors, paired with high construction costs. These factors, along with commercial real estate's demonstrated performance as an effective hedge against high inflation, bode well for the outlook for owners of high-quality, income-producing, well-located real estate.

Our high conviction, benchmark-agnostic investment approach allows us to maintain a laser-focus on identifying and owning only

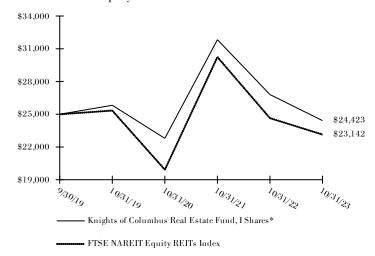

the highest-quality companies in our investable universe. We have high conviction in our fundamental research and confidence in the management teams of the companies we own. While capital markets continue to experience transitory periods of market fixation on non-fundamental factors, we believe our portfolio is well-positioned as investor attention turns back to fundamentals.

Knights of Columbus International Equity Fund

Global equities were strong in the first nine months of the fiscal year as they rebounded from the sharp sell-off of 2022, which stemmed from rising interest rates. Even though the benchmark fell in the final three months of the period, it still returned an attractive 12.72%.

The primary economic and market dynamics revolved around high inflation, central banks' attempts to slow it with increased interest rates, and fears that the whole exercise would cause an economic slowdown. That fear never materialized, though, and world GDP for 2023 looks like it will come in only slightly below 2022. Both corporate and consumer spending have held up much better than expected, keeping most major economies growing, even if Western Europe and the UK are only slightly positive. The Energy sector was a major story, as it was last year. First, it fell from its highs at the start of the Ukraine-Russia conflict, then rose again with the conflict in the Middle East.

Information Technology was the best sector for returns, rising +21.4%, followed closely by Consumer Discretionary at +19.1%. The weakest were Real Estate, which was hurt by higher interest rates and rose only +2.4%, and Health Care, which increased +5.7%. Japan was the strongest region, rising +17.1%, helped by low-interest rates that buoyed valuations and kept borrowing costs low. Canada was the weakest, and only negative, region, slipping -1.1%.

The Fund appreciated +11.49%, trailing the benchmark by 140 basis points (bps). Consumer Staples added the most to performance, and the two best holdings were both beneficiaries of high-end consumer spending: French cosmetics company L'Oreal SA (1.68% Avg. Wgt, +35.1% Return) and its Brazilian competitor Natura & Co. Holdings S.A. (0.31%, +17.7%). The sector that detracted the most from performance was Health Care. Danish oncology drug maker Genmab A/S (1.00%, -37.7%) reported several disappointing financial results. The other negative impact was from not owning (due to USCCB restrictions) Novo Nordisk A/S (0.00%, +78.6%), which rose sharply on sales of its weight-loss drug.

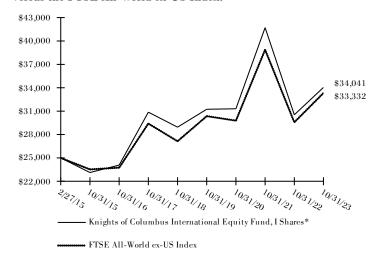

Investors appear to have accepted that interest rates will be "higher for longer," since inflation has been higher, and unemployment has been lower than expected. This has limited further upside in global equity markets. The growing concern, however, is the degree to which economies and corporate earnings are beginning to slow. For these reasons, we remain slightly defensively positioned in the portfolio while maintaining our approach of sector, region, and company diversification.

Percentages are based on Net Assets of \$183,920,481.

- (A) Securities sold within the terms of a private placement memorandum, exempt from registration under section 144A of the Securities Act of 1933, as amended, and maybe sold only to dealers in the program or other "accredited investors". The total value of these securities at October 31, 2023 was \$27,420,601 and represented 14.9% of Net Assets.
- (B) Variable or floating rate security. The rate shown is the effective interest rate as of period end. The rates on certain securities are not based on published reference rates and spreads and are either determined by the issuer or agent based on current market conditions; by using a formula based on the rates of underlying loans; or by adjusting periodically based on prevailing interest rates.
- (C) Step coupon security. Coupon rate will either increase (step-up bond) or decrease (step-down bond) at regular intervals until maturity. Interest rate shown reflects the rate currently in effect.

See "Glossary" for abbreviations.

As of October 31, 2023, all of the Fund's investments in securities were considered Level 2, in accordance with the authoritative guidance on fair value measurements and disclosure under U.S. generally accepted accounting principles.

For more information on valuation inputs, see Note 2 – Significant Accounting Policies in the Notes to Financial Statements.

For more information on valuation inputs, see Note 2 – Significant Accounting Policies in the Notes to Financial Statements.

Percentages are based on Net Assets of \$183,576,840.

- (A) Variable or floating rate security. The rate shown is the effective interest rate as of period end. The rates on certain securities are not based on published reference rates and spreads and are either determined by the issuer or agent based on current market conditions; by using a formula based on the rates of underlying loans; or by adjusting periodically based on prevailing interest rates.
- (B) Securities sold within the terms of a private placement memorandum, exempt from registration under section 144A of the Securities Act of 1933, as amended, and maybe sold only to dealers in the program or other "accredited investors". The total value of these securities at October 31, 2023 was \$27,602,324 and represented 15.0% of Net Assets.
- (C) Level 3 security in accordance with fair value hierarchy.

See "Glossary" for abbreviations.

The following is a summary of the level of inputs used as of October 31, 2023, in valuing the Fund's investments carried at market value:

| Investments in | | | | | |
|-------------------|---------|-------------------|----|-----------------------|----------------|
| Securities | Level 1 | Level 2 | I | evel 3 ⁽¹⁾ | Total |
| U.S. Treasury | | | | | |
| Obligations | \$ _ | \$ 78,251,306 | \$ | _ | \$ 78,251,306 |
| U.S. Government | | | | | |
| Agency | | | | | |

The following is a summary of the level of inputs used as of October 31, 2023, in valuing the Fund's investments and other financial instruments carried at market value:

| Investments in | | | | |
|-------------------|---------------|-------------|------------|---------------|
| Securities | Level 1 | Level 2 | Level 3(1) | Total |
| Common Stock | \$ 99,501,086 | \$ 623 | \$ 9,008 | \$ 99,510,717 |
| Rights | _ | _ | 1,130 | 1,130 |
| Total Investments | | | | |
| in Securities | \$ 99,501,086 | \$ 623 | \$ 10,138 | \$ 99,511,847 |
| Other Financial | | | | |
| Instruments | Level 1 | Level 2 | Level 3 | Total |
| OTC Swaps | | | | |
| Total Return | | | | |
| Swaps* | | | | |
| Unrealized | | | | |
| Depreciation | _ | (93,178) | _ | (93,178) |
| Total Other | | | | |
| Financial | | | | |
| Instruments | \$ | \$ (93,178) | \$ — | \$ (93,178) |

- (1) A reconciliation of Level 3 investments is presented when the Fund has a significant amount of Level 3 investments at the end of the period in relation to net assets. Management has concluded that Level 3 investments are not material in relation to net assets.
- * Swap contracts are valued at the unrealized depreciation on the instrument.

Amounts designated as "—" are \$0 or have been rounded to \$0.

For more information on valuation inputs, see Note 2 – Significant Accounting Policies in the Notes to Financial Statements.

- Per share data calculated using the average shares method.
- ** See Note 2 in the Notes to Financial Statements.
- † Total return and portfolio turnover rate are for the period indicated and have not been annualized. Total return would have been lower had the Adviser not waived a portion of its fee. Returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.
- Effective March 1, 2018, Institutional Shares were renamed as I Shares.
- # Amount is less than \$0.005.
- ## Effective July 20, 2020, Global Real Estate Fund was renamed as Real Estate Fund.
- Effective March 1, 2018, Limited Duration Bond Fund was renamed as Limited Duration Fund.
- †† Effective March 1, 2018, Small Cap Equity Fund was renamed as Small Cap Fund.
- (1) Effective February 25, 2021, Investor Shares Class were converted to I Shares Class of the Fund.
- (2) The expense ratio includes dividend expense. Had this expense been excluded the ratios would have been 1.50%.
- (3) Ratios include previously waived investment advisory fees recovered.
- (4) The expense ratio includes dividend and interest expense. Had this expense been excluded the ratios would have been 1.50%, 1.86%, and (1.85)%.
- (5) Commenced operations on December 2, 2019. All ratios for the period have been annualized.
- (6) The expense ratio includes dividend expense. Had this expense been excluded the ratios would have been 1.50%, 2.17%, and (0.58)%.
- (7) Commenced operations on December 31, 2019. All ratios for the period have been annualized.
- (8) Commenced operations on September 30, 2019. All ratios for the period have been annualized.

Amounts designated as "--" are \$0 or have been rounded to \$0.

NOTES TO FINANCIAL STATEMENTS

1. Organization:

The Advisors' Inner Circle Fund III (the "Trust") is organized as a Delaware statutory trust under an Agreement and Declaration of Trust dated December 4, 2013. The Trust is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company with 65 funds. The financial statements herein are those of the Knights of Columbus Limited Duration Fund (the "Limited Duration Fund"), the Knights of Columbus Core Bond Fund (the "Core Bond Fund"), the Knights of Columbus Long/ Short Equity Fund (the "Long/Short Equity Fund"), the Knights of Columbus Large Cap Value Fund (the "Large Cap Value Fund"), the Knights of Columbus Large Cap Growth Fund (the "Large Cap Growth Fund"), the Knights of Columbus Small Cap Fund (the "Small Cap Fund"), the Knights of Columbus U.S. All Cap Index Fund (the "U.S. All Cap Index Fund"), the Knights of Columbus Real Estate Fund (the "Real Estate Fund") and the Knights of Columbus International Equity Fund (the "International Equity Fund") (collectively the "Funds," individually a "Fund"), each of which is a diversified Fund, except the Large Cap Growth Fund, which is a non-diversified Fund. The investment objective of the Limited Duration Fund and Core Bond Fund is to seek current income and capital preservation. The investment objective of the Long/Short Equity Fund, Large Cap Value Fund, Large Cap Growth Fund, Small Cap Fund and International Equity Fund is to seek long-term capital appreciation. The investment objective of the Real Estate Fund is to seek current income and capital appreciation. The U.S. All Cap Index Fund seeks investment results to the performance of an index that measures the investment return of the broad U.S. stock market, excluding companies whose policies and practices are inconsistent with the United States Conference of Catholic Bishops' Socially Responsible Investing Guidelines (the "USCCB Guidelines"). The financial statements of the remaining funds of the Trust are presented separately. The assets of each fund are segregated, and a shareholder's interest is limited to the fund in which shares are held.

Effective February 25, 2021, Investor Shares Class were converted to I Shares Class of the Funds. After the Conversion Date, Investor Shares will no longer be offered by the Funds, and were terminated as a separately designated class of the Funds.

2. Significant Accounting Policies:

The following are significant accounting policies, which are consistently followed in the preparation of its financial statements of the Funds. The Funds are investment companies that apply the accounting and reporting guidance issued in Topic 946 by the U.S. Financial Accounting Standards Board ("FASB").

Use of Estimates — The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("U.S. GAAP") requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates and such differences could be material.

Security Valuation — Securities listed on a securities exchange, market or automated quotation system for which quotations are readily available (except for securities traded on the NASDAQ Stock Market (the "NASDAQ")), including securities traded over the counter, are valued at the last quoted sale price on an exchange or market (foreign or domestic) on which they are traded on valuation date (or at approximately 4:00 pm ET if a security's primary exchange is normally open at that time), or, if there is no such reported sale on the valuation date, at the most recent quoted bid price. For securities traded on NASDAQ, the NASDAQ Official Closing Price will be used. If available, debt securities are priced based upon valuations provided by independent, third-party pricing agents. Such values generally reflect the last reported sales price if the security is actively traded. The third-party pricing agents may also value debt securities at an evaluated bid price by employing methodologies that utilize actual market transactions, broker-supplied valuations, or other methodologies designed to identify the market value for such securities. Such methodologies generally consider such factors as security prices, yields, maturities, call features, ratings and developments relating to specific securities in arriving at valuations. On the first day a new debt security purchase is recorded, if a price is not available on the automated pricing feeds from our primary and secondary pricing vendors nor is it available from an independent broker, the security may be valued at its purchase price. Each day thereafter, the debt security will be valued according to the Trusts' Fair Value Procedures until an independent source can be secured. Debt obligations with remaining maturities of sixty days or less may be valued at their amortized cost, which approximates market value provided that it is determined the amortized cost continues to approximate fair value. Should existing credit, liquidity or interest rate conditions in the relevant markets and issuer specific circumstances suggest that amortized cost does not approximate fair value, then the amortized cost method may not be used. The prices for foreign securities are reported in local currency and converted to U.S. dollars using currency exchange rates.

Securities for which market prices are not "readily available" are valued in accordance with fair value procedures (the "Fair Value Procedures") established by the Adviser and approved by the Trust's Board of Trustees (the "Board"). Pursuant to Rule 2a-5 under the 1940 Act, the Board has designated the Adviser as the "valuation designee" to determine the fair value of securities and other instruments for which no readily available market quotations are available. The Fair Value Procedures are implemented through a Fair Value Committee (the "Committee") of the Adviser.

Some of the more common reasons that may necessitate that a security be valued using fair value procedures include: the security's trading has been halted or suspended; the security has been de-listed from a national exchange; the security's primary trading market is temporarily closed at a time when under normal conditions it would be open; or the security's primary pricing source is not able or willing

to provide a price. When a security is valued in accordance with the fair value procedures, the Committee will determine the value after taking into consideration relevant information reasonably available to the Committee.

For securities that principally trade on a foreign market or exchange, a significant gap in time can exist between the time of a particular security's last trade and the time at which a Fund calculates its net asset value. The closing prices of such securities may no longer reflect their market value at the time a Fund calculates net asset value if an event that could materially affect the value of those securities (a "Significant Event") has occurred between the time of the security's last close and the time that a Fund calculates net asset value. A Significant Event may relate to a single issuer or to an entire market sector. If the Adviser becomes aware of a Significant Event that has occurred with respect to a security or group of securities after the closing of the exchange or market on which the security or securities principally trade, but before the time at which a Fund calculates net asset value, it may request that a Committee meeting be called.

The Funds use Intercontinental Exchange Data Pricing & Reference Data, LLC ("ICE") as a third party fair valuation vendor when the fair value trigger is met. ICE provides a fair value for foreign securities in the Funds based on certain factors and methodologies (involving, generally, tracking valuation correlations between the U.S. market and each non-U.S. security) applied by ICE in the event that there is a movement in the U.S. market that exceeds a specific threshold established by the Committee. The Committee establishes a "confidence interval" which is used to determine the level of correlation between the value of a foreign security and movements in the U.S. market before a particular security is fair valued when the threshold is exceeded. In the event that the threshold established by the Committee is exceeded on a specific day, the Funds value theirs non-U.S. securities that exceed the applicable "confidence interval" based upon the fair values provided by ICE. In such event, it is not necessary to hold a Committee meeting. In the event that the Adviser believes that the fair values provided by ICE are not reliable, the Adviser contacts SEI Investments Global Fund Services (the "Administrator") and may request that a meeting of the Committee be held.

If a local market in which the Funds own securities is closed for one or more days, the Funds shall value all securities held in the corresponding currency based on the fair value prices provided by ICE using the predetermined confidence interval discussed above.

In accordance with the authoritative guidance on fair value measurements and disclosure under U.S. GAAP, the Funds disclose the fair value of their investments in a hierarchy that prioritizes the inputs to valuation techniques used to measure the fair value. The objective of a fair value measurement is to determine the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). Accordingly, the fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under ASC 320 are described below:

Level 1 — Unadjusted quoted prices in active markets for identical, unrestricted assets or liabilities that the Funds have the ability to access at the measurement date;

Level 2 — Other significant observable inputs (includes quoted prices for similar securities, interest rates, prepayment speeds, credit risk, referenced indices, quoted prices in inactive markets, adjusted quoted prices in active markets, adjusted quoted prices on foreign equity securities that were adjusted in accordance with the Adviser's pricing procedures, etc.); and

Level 3 — Prices, inputs or exotic modeling techniques which are both significant to the fair value measurement and unobservable (supported by little or no market activity).

Investments are classified within the level of the lowest significant input considered in determining fair value. Investments classified within Level 3 whose fair value measurement considers several inputs may include Level 1 or Level 2 inputs as components of the overall fair value measurement.

The unobservable inputs used to determine fair value of recurring Level 3 assets may have similar or diverging impacts on valuation. Significant increases and decreases in these inputs in isolation and interrelationships between those inputs could result in significantly higher or lower fair value measurement.

Federal Income Taxes — It is each Fund's intention to continue to qualify as a regulated investment company for Federal income tax purposes by complying with the appropriate provisions of Subchapter M of the Internal Revenue Code of 1986, as amended, and to distribute substantially all of its income to shareholders. Accordingly, no provision for Federal income taxes has been made in the financial statements.

The Funds evaluate tax positions taken or expected to be taken in the course of preparing the Funds' tax returns to determine whether it is "more likely- than-not" (i.e., greater than 50-percent) that each tax position will be sustained upon examination by a taxing authority based on the technical merits of the position. Tax positions deemed to meet the more-likely-than-not threshold are recorded as a tax benefit in the current year. The Funds did not record any tax provision in the current period. However, management's conclusions regarding tax positions taken may be subject to review and adjustment at a later date based on factors including, but not limited to, examination by tax authorities (i.e., the open tax year ends, since inception), on-going analysis of and changes to tax laws, regulations and interpretations thereof.

As of and during the year ended October 31, 2023, the Funds did not have a liability for any unrecognized tax benefits. The Funds recognize interest and penalties, if any, related to unrecognized tax benefits as income tax expense in the Statements of Operations. During the period the Funds did not incur any interest or penalties.

Security Transactions and Investment Income — Security transactions are accounted for on trade date for financial reporting purposes. Dividend income is recorded on the ex-dividend date and interest income is recognized on the accrual basis. Costs used in determining realized gains and losses on the sales of investment securities are based on specific identification. Interest income is recognized on an accrual basis from settlement date. Discounts and premiums on securities purchased are accreted and amortized using the effective interest method. Realized gains (losses) on paydowns of mortgage-backed and asset-backed securities are recorded as an adjustment to interest income.

Foreign Currency Translation — The books and records of the Funds are maintained in U.S. dollars. Investment securities and other assets and liabilities denominated in a foreign currency are translated into U.S. dollars on the date of valuation. The Funds do not isolate that portion of realized or unrealized gains and losses resulting from changes in the foreign exchange rate from fluctuations arising from changes in the market prices of the securities. These gains and losses are included in net realized gains and losses on investments and net change in unrealized appreciation (depreciation) on investments on the Statements of Operations. Net realized and unrealized gains and losses on foreign currency transactions represent net foreign exchange gains or losses from foreign currency exchange contracts, disposition of foreign currencies, currency gains or losses realized between trade and settlement dates on securities transactions and the difference between the amount of the investment income and foreign withholding taxes recorded on the Funds' books and the U.S. dollar equivalent amounts actually received or paid.

Options Written/Purchased — The Long/Short Equity Fund invested in financial options contracts to add return or to hedge their existing portfolio securities. When a Fund writes or purchases an option, an amount equal to the premium received or paid by a Fund is recorded as a liability or an asset and is subsequently adjusted to the current market value of the option written or purchased. Premiums received or paid from writing or purchasing options which expire unexercised are treated by a Fund on the expiration date as realized gains or losses. The difference between the premium and the amount paid or received on affecting a closing purchase or sale transaction, including brokerage commissions, is also treated as a realized gain or loss. If an option is exercised, the premium paid or received is added to the cost of the purchase or proceeds from the sale in determining whether a Fund has realized a gain or a loss. The risk in writing a call option is that a Fund gives up the opportunity for profit if the market price of the security increases. The risk in writing a put option is that a Fund may incur a loss if the market price of the security decreases and the option is exercised. The risk in purchasing an option is that a Fund pays a premium whether or not the option is exercised. A Fund also has the additional risk of being unable to enter into a closing transaction at an acceptable price if a liquid secondary market does not exist. Option contracts also involve the risk that they may not work as intended due to unanticipated developments in market conditions or other causes. Finally, for written options, the risk exists that losses could exceed amounts disclosed on the Statements of Assets and Liabilities. The Long/Short Equity Fund did not hold option contracts as of October 31, 2023.

For the year ended October 31, 2023, the quarterly average balances of options held by the Long/Short Equity Fund was as follows:

Average Quarterly Market Value Contracts Purchased \$ 5,327

Average Quarterly Market Value Contracts Written \$ -

Securities Sold Short — Consistent with Long/Short Equity Fund's investment objectives, the Fund may engage in short sales. Short sales are transactions under which the Fund sells a security it does not own. To complete such a transaction, the Fund must borrow the security to make delivery to the buyer. The Fund then is obligated to replace the security borrowed by purchasing the security at the market price at the time of the replacement. The price at such time may be more or less than the price at which the security was sold by a Fund. Until the security is replaced, the Fund is required to pay the lender amounts equal to any dividends or interest that accrue during the period of the loan. Dividends and interest are shown as an expense for financial reporting purposes. To borrow the security, the Fund also may be required to pay a premium, which would decrease proceeds of the security sold. The proceeds of the short sale are retained by the broker, to the extent necessary to meet margin requirements, until the short position is closed out. A gain, limited to the price at which a Fund sold the security short, or a loss, unlimited in size, will be recognized upon the close of a short sale.

Until the Fund closes its short position or replaces the borrowed security, the Fund will: (a) maintain a segregated account containing cash or liquid securities at such a level that (i) the amount deposited in the account plus the amount deposited with the broker as collateral will equal the current value of the security sold short; and (ii) the amount deposited in the segregated account plus the amount deposited with the broker as collateral will not be less than the market value of the security at the time the security was sold short, or (b) otherwise cover the Fund's short positions. As of October 31, 2023, the Long/Short Equity Fund had open short positions as disclosed in the Fund's Schedule of Investments.

In accordance with the terms of its prime brokerage agreement, the Fund may receive rebate income or be charged a fee on borrowed securities. Such income or fee is calculated on a daily basis based upon the market value of each borrowed security and a variable rate that is dependent upon the availability of such security. The Fund records these prime broker charges on a net basis as interest income or interest expense on securities sold short. For the year ended October 31, 2023, the Fund earned rebate income of \$1,292,970, which is

included in interest income on the Statements of Operations. In addition, the Fund is required to pay the lender any dividends declared on short positions. Such amounts are recorded on the ex-dividend date as dividend expense on securities sold short and recognized as "dividend expense" on the Statements of Operations.

Short sales are collateralized by cash deposits with the prime broker, Wells Fargo Bank, N.A., and pledged securities held at the custodian, Brown Brothers Harriman & Co. The collateral required is determined daily by reference to the market value on short positions.

The Fund is required to maintain margin cash balances at the prime broker sufficient to satisfy its short sales positions on a daily basis and is charged an interest expense at the benchmark rate as defined in the prime brokerage agreement plus 150 basis points on the amount of any shortfall in the required cash margin. During the period, the benchmark rate consisted of a blended rate of the U.S. Overnight Bank Funding Rate and a predetermined spread rate. For the year ended October 31, 2023, the Fund did not incur any interest expense. In the event the Fund has excess cash collateral, the Fund receives interest income as defined in the prime brokerage agreement. During the period, the Fund had positive effective balance and earned daily income based on the benchmark rate. The blended rate included the U.S. Overnight Bank Funding Rate minus 45 basis points. For the year ended October 31, 2023, the Fund earned interest income of \$211,853, which is included in interest income on the Statements of Operations.

Swap Contracts — The Long/Short Equity Fund and the U.S. All Cap Index Fund are authorized to enter into swap contracts, including total return swaps and equity swaps contracts. Swaps are a two-party contract in which the seller (buyer) will pay to the buyer (seller) the difference between the current value of a security and its value at the time the contract was entered. In a typical equity swap, one party agrees to pay another party the return on a stock, stock index or basket of stocks in return for a specified interest rate. By entering into an equity index swap, for example, the index receiver can gain exposure to stocks making up the index of securities without actually purchasing those stocks. Equity index swaps involve not only the risk associated with investment in the securities represented in the index, but also the risk that the performance of such securities, including dividends, will not exceed the return on the interest rate that the Fund will be committed to pay.

Total return swaps are contracts in which one party agrees to make payments of the total return from a reference instrument — which may be a single asset, a pool of assets or an index of assets — during a specified period, in return for payments equal to a fixed or floating rate of interest or the total return from another underlying reference instrument. The total return includes appreciation or depreciation on the underlying asset, plus any interest or dividend payments. Payments under the swap are based upon an agreed upon principal amount but, since the principal amount is not exchanged, it represents neither an asset nor a liability to either counterparty, and is referred to as notional. Total return swaps are marked to market daily using different sources, including quotations from counterparties, pricing services, brokers or market makers. The unrealized appreciation or depreciation related to the change in the valuation of the notional amount of the swap is combined with the amount due to the Fund at termination or settlement. The primary risks associated with total return swaps are credit risks (if the counterparty fails to meet its obligations) and market risk (if there is no liquid market for the swap or unfavorable changes occur to the underlying reference instrument).

Periodic payments made or received are recorded as realized gains or losses. At period end, the Statements of Assets and Liabilities reflect, if any, unrealized appreciation or depreciation and accrued periodic payments for swap contracts the Fund may have open at period end. Entering into swap contracts involve, to varying degrees, elements of credit, interest rate and market risk in excess of the amounts recognized on the Statements of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these contracts, that the counterparty to the contract may default on its obligation to perform and that there may be unfavorable changes in market conditions or fluctuations in interest rates. Swap contracts outstanding at period end, if any, are listed on the Schedule of Investments. In connection with swap contracts, cash or securities may be segregated as collateral by the Fund's custodian.

There is the risk that the counterparty refuses to continue to enter into swap agreements with the Fund in the future, or requires increased fees, which could impair the Fund's ability to achieve its investment objective. A counterparty may also increase its collateral requirements, which may limit the Fund's ability to use leverage and reduce investment returns. In addition, if the Fund cannot locate a counterparty willing to enter into transactions with the Fund, it will not be able to implement its investment strategy. During the year ended October 31, 2023, the Funds' swap agreements were with one counterparty, Wells Fargo Bank, N.A.

For the year ended October 31, 2023, only the U.S. All Cap Index Fund employed total returns swaps. The quarterly average balances of swap contracts held by the Fund was as follows:

| Average Quarterly Market Value Balance Long | \$ 3,396,473 |
|--|-------------------|
| Average Quarterly Market Value Balance Short | \$ (3,329,763) |

Cash — Idle cash may be swept into various time deposit accounts and money market sweep accounts and is classified as cash on the Statements of Assets and Liabilities. The Funds maintain cash in bank deposit accounts which, at times, may exceed United States federally insured limits. Amounts invested are available on the same business day.

Expenses — Expenses of the Trust that can be directly attributed to a particular Fund are borne by that Fund. Expenses which cannot be directly attributed to a Fund are apportioned among the Funds of the Trust based on the number of funds and/or relative net assets.

Classes — Class specific expenses are borne by that class of shares. Income, realized and unrealized gains and losses and non-class specific expenses are allocated to the respective class on the basis of relative daily net assets.

Dividends and Distributions to Shareholders — The Funds will distribute substantially all of their net investment income and net realized capital gains, if any, at least annually. All distributions are recorded on ex-dividend date.

Investments in REITs — Dividend income from Real Estate Investment Trusts ("REIT") is recorded based on the income included in distributions received from the REIT investments using published REIT reclassifications, including some management estimates when actual amounts are not available. Distributions received in excess of this estimated amount are recorded as a reduction of the cost of investments or reclassified to capital gains. The actual amounts of income, return of capital, and capital gains are only determined by each REIT after its fiscal year-end, and may differ from the estimated amounts.

Redemption Fees — The Limited Duration Fund, Core Bond Fund, Long/Short Equity Fund, Large Cap Value Fund, Large Cap Growth Fund, Small Cap Fund, U.S. All Cap Index Fund, Real Estate Fund and International Equity Fund retain a redemption fee of 2.00% on redemptions of capital shares held for less than thirty days. For the year ended October 31, 2023, the Funds retained fees of \$9,034, \$513, \$22,359, \$111, \$624, \$313, \$256, \$0 and \$381, respectively. For the year ended October 31, 2022, the Funds retained fees of \$90, \$85, \$500, \$117, \$53, \$24, \$73, \$35 and \$435, respectively. Such fees are retained by the Funds for the benefit of the remaining shareholders and are recorded as additions to fund capital.

3. Derivative Transactions:

The following table shows the derivatives categorized by underlying risk exposure.

The fair value of derivative instruments as of October 31, 2023 was as follows:

| | Asset Derivatives | | Liability Derivatives | |
|-------------------------|---|------------|---|---------------|
| | Statements of Assets and Liabilities | Fair Value | Statements of Assets and Liabilities | Fair Value |
| U.S. All Cap Index Fu | nd | | | |
| Equity contracts | Unrealized appreciation on swap contracts | \$ -† | Unrealized depreciation on swap contracts | \$ 93,178† |
| Total Derivatives not a | accounted for as hedging instruments | \$ | | \$ 93,178 |

Includes cumulative appreciation (depreciation) of swap contracts as reported in the Schedules of Investments. Market Value is reported within the Statements of Assets and Liabilities for swap contracts that have paid premiums.

The effect of derivative instruments on the Statements of Operations for the year ended October 31, 2023.

Amount of realized gain or (loss) on derivatives recognized in income:

| | Pı | ırchased | | Written | | Forwar | d | | |
|--|---------|----------|----|-------------|-----------|----------|----|---------|-----------------|
| | Opt | ions and | (| Options and | | Currenc | y | | |
| Derivatives Not Accounted for as Hedging Instruments | S | waptions | | Swaptions | Futures | Contract | s | Swaps | Total |
| Long/Short Equity Fund | | | | | | | | | |
| Equity contracts | \$ (11) | 2,016) | \$ | _ | \$ — ; | 3 — | \$ | _ | \$ (112,016) |
| Total | \$ (11: | 2,016) | \$ | | \$ _ : | 3 — | \$ | | \$ (112,016) |
| | | | | | | | | | |
| U.S. All Cap Index Fund | | | | | | | | | |
| Equity contracts | \$ | _ | \$ | _ | \$ — ; | 3 — | \$ | 327,053 | \$ 327,053 |
| Total | \$ | | \$ | | \$; | 3 — | \$ | 327,053 | \$ 327,053 |

Change in unrealized appreciation or (depreciation) on derivatives recognized in income:

| Derivatives Not Accounted for as Hedging Instruments | Purchased Options and Swaptions | Written Options and Swaptions | Futures | Forward Currency Contracts | Swaps | Total |
|--|---------------------------------------|-------------------------------------|---------------------------|----------------------------------|------------------------------|------------------------------|
| Long/Short Equity Fund Equity contracts Total | \$ (88,721) (88,721) | \$ | \$ — <u>\$</u> — \$ | = | \$ <u> </u> | \$ (88,721) \$ (88,721) |
| U.S. All Cap Index Fund Equity contracts Total | \$ | \$ | \$ — <u>\$</u> — \$ | | \$ (164,579) (164,579) | \$ (164,579) \$ (164,579) |

4. Offsetting Assets and Liabilities:

The Funds are required to disclose the impact of offsetting assets and liabilities represented in the Statements of Assets and Liabilities to enable users of the financial statements to evaluate the effect or potential effect of netting arrangements on its financial position for recognized assets and liabilities. These recognized assets and liabilities are financial instruments and derivative instruments that are either subject to an enforceable master netting arrangement or similar agreement or meet the following right of setoff criteria: the amounts owed by the Fund to another party are determinable, the Fund has the right to set off the amounts owed with the amounts owed by the other party, the Fund intends to set off, and the Fund's right of setoff is enforceable at law.

The International Swaps and Derivatives Association, Inc. ("ISDA") Master Agreements maintain provisions for general obligations, representations, agreements, collateral, and events of default or termination. The occurrence of a specified event of termination may give a counterparty the right to terminate all of its contracts and effect settlement of all outstanding transactions under the applicable ISDA Master Agreement.

To reduce counterparty risk with respect to Over-the-Counter ("OTC") transactions, the Long/Short Equity Fund and the U.S. All Cap Index Fund have entered into master netting arrangements, established within the Funds' ISDA Master Agreements, which allow the Fund to make (or to have an entitlement to receive) a single net payment in the event of default (close-out netting) for outstanding payables and receivables with respect to certain OTC positions in swaps for each individual counterparty. In addition, the Funds may require that certain counterparties post cash and/or securities in collateral accounts to cover their net payment obligations for those derivative contracts subject to ISDA Master Agreements. If the counterparty fails to perform under these contracts and agreements, the cash and/or securities will be made available to the Funds.

For financial reporting purposes, the Funds do not offset derivative assets and derivative liabilities that are subject to netting arrangements in the Statements of Assets and Liabilities. Bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or prohibitions against the right of offset in bankruptcy, insolvency or other events.

Collateral terms are contract specific for OTC derivatives. For derivatives traded under an ISDA Master Agreement, the collateral requirements are typically calculated by netting marked-to-market amount of each transaction under such agreement and comparing that amount to the value of any collateral currently pledged by the Funds or the counterparty.

For financial reporting purposes, cash collateral that has been pledged to cover obligations of the Funds, if any, is reported separately on the Statements of Assets and Liabilities as cash pledged as collateral. Non-cash collateral pledged by the Funds, if any, is noted in the Schedules of Investments. Generally, the amount of collateral due from or to a party must exceed a minimum transfer amount threshold before a transfer has to be made. To the extent amounts due to the Funds from its respective counterparties are not fully collateralized, contractually or otherwise, the Funds bear the risk of loss from counterparty nonperformance. As of October 31, 2023, the Long/Short Equity Fund did not hold financial instruments or OTC derivatives subject to master netting arrangements.

The following is a summary by counterparty of the market value of swap agreements and collateral (received)/pledged for the U.S. All Cap Index Fund as of October 31, 2023:

| | | | Gross Amounts not | offset in the Statements of Assets and Liabilit | ies |
|---------------------------------------|--|---|----------------------------------|---|---------------------------|
| Gross Amounts of Recognized Assets | Gross Amounts Offset in the Statements of Assets and Liabilities | Net Amounts Presented in the Statements of Assets and Liabilities | Financial Instruments for Offset | Cash Collateral (Received) Pledged ⁽¹⁾ | Net Amount ⁽² |
| s — | * — | \$ — | \$ — | s — | s — |
| | | | Gross Amounts not | offset in the Statements of Assets and Liabilit | ies |
| | Gross Amounts Offset in the | Net Amounts Presented in | | | |
| Gross Amounts of | Statements of Assets and | the Statements of Assets | | | |
| Recognized Liabilities | Liabilities | and Liabilities | Financial Instruments for Offset | Cash Collateral (Received) Pledged ⁽¹⁾ | Net Amount ⁽²⁾ |
| \$93,178 | 3 — | \$ 93.178 | \$(93,178) | 8 — | s — |

⁽¹⁾ Excess collateral pledged is not shown for financial reporting purposes.

(2) Net Exposures represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. Exposure from OTC financial derivative instruments can only be netted across transactions governed under the same master agreement with the same legal entity.

5. Transactions with Affiliates:

Certain officers of the Trust are also employees of SEI Investments Global Funds Services (the "Administrator"), a wholly owned subsidiary of SEI Investments Company, and/or SEI Investments Distribution Co. (the "Distributor"). Such officers are paid no fees by the Trust, other than the Chief Compliance Officer ("CCO") as described below, for serving as officers of the Trust.

A portion of the services provided by the CCO and his staff, whom are employees of the Administrator, are paid for by the Trust as incurred. The services include regulatory oversight of the Trust's Advisors and service providers as required by SEC regulations. The CCO's services and fees have been approved by and are reviewed by the Board.

6. Administration, Distribution, Shareholder Servicing, Transfer Agent and Custody Agreements:

The Funds and SEI Investments Global Fund Services (the "Administrator") are parties to an Administration Agreement under which the Administrator provides management and administrative services to the Funds. For these services, the Administrator is paid an asset-based fee, which will vary depending on the number of share classes and the average daily net assets of the Funds.

For the year ended October 31, 2023, the Funds were charged the following for these services, as shown on the Statements of Operations:

| | Administration Fees |
|----------------------------|---------------------|
| Limited Duration Fund. | \$107,607 |
| Core Bond Fund | 111,923 |
| Long/Short Equity Fund | 51,114 |
| Large Cap Value Fund | 98,557 |
| Large Cap Growth Fund | 92,590 |
| Small Cap Fund | 84,966 |
| U.S. All Cap Index Fund | 57,171 |
| Real Estate Fund. | 86,493 |
| International Equity Fund. | 99,381 |

The Trust and the Distribution are parties to a Distribution Agreement. The Distributor receives no fees under the agreement.

The Funds have adopted a shareholder servicing plan that provides that the Funds may pay financial intermediaries for shareholder services in an annual amount not to exceed 0.20% based on the average daily net assets of the Funds' Class S Shares. The Funds do not pay these service fees on shares purchased directly. In addition to payments made directly to financial intermediaries by the Funds, the Adviser or its affiliates may, at their own expense, pay financial intermediaries for these and other services to the Funds' shareholders.

For the year ended October 31, 2023, the Funds were charged the following rates for these services:

| | Class S Shares |
|---------------------------|----------------|
| Limited Duration Fund | 0.10% |
| Core Bond Fund | 0.10% |
| Long/Short Equity Fund | N/A |
| Large Cap Value Fund | 0.10% |
| Large Cap Growth Fund | 0.10% |
| Small Cap Fund | 0.10% |
| U.S. All Cap Index Fund | N/A |
| Real Estate Fund | N/A |
| International Equity Fund | 0.10% |

DST Systems, Inc. serves as the Transfer Agent and dividend disbursing agent for the Funds under a transfer agency agreement.

Brown Brothers Harriman & Co. serves as custodian (the "Custodian") for the Funds. The Custodian plays no role in determining the investment policies of the Funds or which securities are to be purchased and sold by the Funds.

7. Investment Advisory Agreements and Sub-advisory Agreements:

Under the terms of the Advisory Agreement, the Adviser provides investment advisory services to the Limited Duration Fund, Core Bond Fund, Long/Short Equity Fund, Large Cap Value Fund, Large Cap Growth Fund, Small Cap Fund, U.S. All Cap Index Fund, Real Estate Fund and International Equity Fund at 0.40%, 0.40%, 1.25%, 0.60%, 0.60%, 0.725%, 0.20%, 0.85%, and 0.90%, respectively, of each Fund's average daily net assets.

The Adviser has contractually agreed to waive fees and/or reimburse expenses to the extent necessary to keep Total Annual Fund Operating Expenses (excluding interest, taxes, brokerage commissions, acquired fund fees and expenses, non-routine expenses and any class-specific expenses (including distribution and/or service (12b-1) fees and shareholder servicing fees) (collectively, "excluded expenses")) for I Shares

and Class S Shares from exceeding certain levels as set forth below until February 28, 2024 (each, a "contractual expense limit"). Refer to Note 1 for the details regarding the termination of the Investor Shares during the period. This agreement may be terminated: (i) by the Board, for any reason at any time; or (ii) by the Adviser, upon ninety (90) days' prior written notice to the Trust, effective as of the close of business on February 28, 2024. Accordingly, the contractual expense limitations for the Limited Duration Fund, Core Bond Fund, Long/ Short Equity Fund, Large Cap Value Fund, Large Cap Growth Fund, Small Cap Fund, U.S. All Cap Index Fund, Real Estate Fund, and International Equity Fund are 0.50%, 0.50%, 1.50%, 0.90%, 0.90%, 1.05%, 0.25%, 1.00%, and 1.10%, respectively.

In addition, if at any point it becomes unnecessary for the Adviser to reduce fees or make expense reimbursements, the Board may permit the Adviser to retain the difference between the Total Annual Fund Operating Expenses and the expense caps listed above to recapture all or a portion of its prior fee reductions or reimbursements made during the preceding three-year period. For the year ended October 31, 2023, the Adviser recaptured previously waived fees in Long/Short Equity Fund, Large Cap Value Fund, Large Cap Growth Fund and Small Cap Fund of \$8,240, \$137,086, \$129,881 and \$51,867, respectively as shown on the Statements of Operations.

As of October 31, 2023, fees previously waived and reimbursed by the Adviser which may be subject to possible future reimbursement are as follows:

| | Subject to | | | | | | |
|-------------|-----------------|------------------|----------------|-------------|--------------------|-------------|---------------|
| | Repayment until | Limited Duration | | Long/Short | U.S. All Cap Index | Real Estate | International |
| Fiscal Year | October 31: | Fund | Core Bond Fund | Equity Fund | Fund | Fund | Equity Fund |
| 2021 | 2024 | \$239,489 | \$233,505 | \$95,666 | \$146,550 | \$121,735 | \$117,278 |
| 2022 | 2025 | 267,235 | 271,831 | 50,260 | 237,415 | 129,112 | 104,328 |
| 2023 | 2026 | 192,731 | 201,983 | 25,917 | 303,121 | 68,350 | 49,478 |
| | Total | \$699,455 | \$707,319 | \$171,843 | \$687,086 | \$319,197 | \$271,084 |

The Trust and the Adviser have entered into an investment advisory agreement dated February 26, 2015, as amended (the "Advisory Agreement"), with respect to the Funds. Under the Advisory Agreement, the Adviser serves as the investment adviser and makes investment decisions for each Fund and continuously reviews, supervises and administers the investment program of each Fund, subject to the supervision of, and policies established by, the Board.

L2 Asset Management, LLC ("L2") and the Adviser have entered into an investment subadvisory agreement, dated September 10, 2019 (the "L2 Subadvisory Agreement"). Under the terms of the L2 Subadvisory Agreement, L2 serves as the investment subadviser for the Long/Short Equity Fund and U.S. All Cap Index Fund (the "L2 Subadvised Funds"), makes investment decisions for the L2 Subadvised Funds, and administers the investment program of the L2 Subadvised Funds, subject to the supervision of, and policies established by, the Adviser and the Board.

Ranger Global Real Estate Advisors, LLC ("Ranger") and the Adviser entered into an investment subadvisory agreement, dated July 24, 2019. As a result of a change-in-control of Ranger, an interim subadvisory agreement was signed on October 26, 2021. On February 15, 2022, a shareholder meeting was held whereby the shareholders of the Real Estate Fund voted to approve a new investment subadvisory agreement (the "Ranger Subadvisory Agreement"), which was entered into on that date. Under the terms of the Ranger Subadvisory Agreement, Ranger serves as the investment subadviser for the Real Estate Fund (the "Ranger Subadvised Fund), makes investment decisions for the Ranger Subadvised Fund, and administers the investment program of the Ranger Subadvised Fund, subject to the supervision of, and policies established by, the Adviser and the Board.

For the services provided pursuant to the L2 Subadvisory Agreement and the Ranger Subadvisory Agreement, each of L2 and Ranger, respectively, receives an annual fee from the Adviser at the following annual rates based on the average daily net assets of each L2 Subadvised Fund and the Ranger Subadvised Fund, respectively.

| | Sub-Adviser Fee Rate |
|-------------------------|----------------------|
| Long/Short Equity Fund | 0.25% |
| U.S. All Cap Index Fund | 0.10% |
| Real Estate Fund | 0.60% |

8. Investment Transactions:

For the year ended October 31, 2023, the Funds made purchases and sales of investment securities other than short-term securities and in-kind transactions as follows:

| | Purchases | Sales | U.S. Government Purchases | U.S. Government Sales and Maturities |
|------------------------|------------------|------------------|---------------------------------|---|
| Limited Duration Fund | \$ 15,959,437 | \$ 24,775,314 | \$ 107,202,941 | \$ 49,543,199 |
| Core Bond Fund | 8,502,891 | 19,158,889 | 84,220,223 | 10,005,536 |
| Long/Short Equity Fund | 75,119,556 | 57,865,909 | _ | _ |
| Large Cap Value Fund | 64,111,197 | 52,484,948 | _ | _ |

| | _ | Purchases | Sales | U.S. Government Purchases | U.S. Government Sales and Maturities |
|---------------------------|----|-------------|-------------|---------------------------------|---|
| Large Cap Growth Fund | \$ | 74,401,470 | 59,658,494 | _ | _ |
| Small Cap Fund | | 62,718,916 | 59,389,098 | _ | _ |
| U.S. All Cap Index Fund | | 38,943,251 | 6,636,309 | _ | _ |
| Real Estate Fund | | 124,181,078 | 107,632,260 | _ | _ |
| International Equity Fund | | 81,177,867 | 66,469,947 | _ | _ |

The Long/Short Equity Fund included cost of purchases to cover securities sold short and the proceeds from securities sold short in the amounts of \$83,097,617 and \$71,230,015, respectively, for the year ended October 31, 2023.

9. Federal Tax Information:

The timing and characterization of certain income and capital gains distributions are determined annually in accordance with federal tax regulations which may differ from U.S. GAAP. As a result, net investment income (loss) and net realized gain (loss) on investment transactions for a reporting period may differ significantly from distributions during such period. These book/tax differences may be temporary or permanent in nature. The permanent differences are primarily related to partnership adjustments, short sale dividends, passive foreign investment companies, swaps, REITS income reclassification to capital gain, distribution reclassification, foreign currency gain/loss and paydown gain/loss reclassification. Certain permanent differences are charged or credited to distributable earnings or paid in capital as appropriate, in the period that the differences arise.

The Real Estate Fund has a tax year that ends on December 31. The following tax disclosures are representative as of October 31, 2023, except for the permanent reclassification and components of distributable earnings (accumulated losses), which are as of December 31, 2022. Accordingly, the disclosures are for informational use by shareholders and are subject to change attributable to activity through the end of the tax year-ending December 31, 2023.

During the year ended October 31, 2023, the Funds had no permanent differences between distributable earnings (accumulated losses) and paid-in-capital.

The tax character of dividends and distributions declared during the last two fiscal years were as follows:

| | Ordinary | Long-Term | Return of | |
|---------------------------------|-------------|--------------|-----------|-------------|
| | Income | Capital Gain | Capital | Total |
| Limited Duration Fund | | | | |
| 2023 | \$4,050,176 | \$ | \$ | \$4,050,176 |
| 2022 | 1,602,802 | 134,097 | _ | 1,736,899 |
| Core Bond Fund | | | | |
| 2023 | 5,342,247 | _ | _ | 5,342,247 |

⁽¹⁾ The Real Estate Fund has a tax year end of December 31.

Post October capital losses represent capital losses realized on investment transactions from November 1, 2022 to December 31, 2022, that, in accordance with Federal Income tax regulations, the Fund(s) may elect to defer and treat as having arisen in the following fiscal year.

The Funds have capital losses carried forward as follows:

| | Short-Term | Long-Term | |
|---------------------------|------------|--------------|-----------------|
| | Loss | Loss | Total |
| Limited Duration Fund | \$ 907,806 | \$ 2,323,947 | \$ 3,231,753 |
| Core Bond Fund | 2,372,350 | 4,822,113 | 7,194,463 |
| Long/Short Equity Fund | 1,155,966 | _ | 1,155,966 |
| Large Cap Value Fund | 1,694,262 | 170,793 | 1,865,055 |
| Large Cap Growth Fund | 4,169,040 | 9,295,073 | 13,464,113 |
| International Equity Fund | 10,959,915 | 4,752,746 | 15,712,661 |

For Federal income tax purposes the difference between Federal tax cost and book cost primarily relates to investments in passive foreign investment companies and deferred losses from wash sale transactions. The Federal tax cost and aggregate gross unrealized appreciation and depreciation for the investments held by the Fund at October 31, 2023, were as follows:

| | | Aggregate Gross Unrealized | Aggregate Gross Unrealized | Net Unrealized Appreciation |
|---------------------------|------------------|-------------------------------|-------------------------------|--------------------------------|
| | Federal Tax Cost | Appreciation | Depreciation | (Depreciation) |
| Limited Duration Fund | \$ 184,501,421 | \$ 192 | \$ (4,305,853) | \$ (4,305,661) |
| Core Bond Fund | 207,247,737 | 40,134 | (27,147,792) | (27,107,658) |
| Long/Short Equity Fund | 57,557,386 | 2,629,719 | 11,072 | 2,640,791 |
| Large Cap Value Fund | 131,209,904 | 23,435,426 | (5,927,325) | 17,508,101 |
| Large Cap Growth Fund | 122,185,052 | 31,296,184 | (3,952,261) | 27,343,923 |
| Small Cap Fund | 117,627,359 | 15,240,035 | (14,949,926) | 290,109 |
| U.S. All Cap Index Fund | 99,987,138 | 9,512,556 | (10,081,025) | (568,469) |
| Real Estate Fund | 146,353,789 | _ | (34,405,921) | (34,405,921) |
| International Equity Fund | 143,535,132 | 10,444,235 | (9,506,912) | 937,323 |

10. Concentration of Risks:

As with all mutual funds, there is no guarantee that the Funds will achieve their investment objectives. You could lose money by investing in the Funds. A Fund share is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any government agency. The principal risk factors affecting shareholders' investments in the Funds are set forth below.

Catholic Values Investing Risk (All Funds) — Each Fund considers the USCCB Guidelines in its investment process and may choose not to purchase, or may sell, including at inopportune times which would result in losses to the Fund, otherwise profitable investments in companies which have been identified as being in conflict with the USCCB Guidelines. This means that a Fund may underperform other similar mutual funds that do not consider the USCCB Guidelines when making investment decisions. In addition, there can be no

guarantee that the activities of the companies identified by any Fund's investment process will align (or be perceived to align) fully with all of the principles contained in the USCCB Guidelines. The process of screening out companies and maintaining the Restricted Securities List that is based on criteria set forth in the USCCB Guidelines relies in part on third-party information or data that may be inaccurate, unavailable or outdated, which could cause a Fund to inadvertently hold securities of companies that conflict with the USCCB Guidelines. For example, to the extent there are changes to the USCCB Guidelines, there could be a significant delay before the changes are fully incorporated into the screening process and reflected in the Restricted Securities List. This may cause a Fund to be invested for a period of time in companies that conflict with the USCCB Guidelines. Although each Fund's investment approach seeks to identify and screen out companies that are inconsistent with the USCCB Guidelines, investors may differ in their views of what companies fit within this category of investments. As a result, to the extent an investor intends to invest in a manner consistent with the investor's interpretation of the USCCB Guidelines, an investment in a Fund may fail to achieve such objective.

Active Management Risk (Core Bond Fund, Limited Duration Fund, Large Cap Growth Fund, Large Cap Value Fund, Small Cap Fund, International Equity Fund, Long/Short Equity Fund, Real Estate Fund) – The Funds are actively managed, which means that investment decisions are made based on investment views. There is no guarantee that the investment views will produce the desired results or expected returns, causing a Fund to lose value or fail to meet its investment objective or underperform its benchmark index or funds with similar investment objectives and strategies. Furthermore, active and frequent trading that can accompany active management, also called "high turnover," may have a negative impact on performance. Active and frequent trading may result in higher brokerage costs or mark-up charges and tax costs, which are ultimately passed on to shareholders of a Fund. Active and frequent trading may also result in adverse tax consequences.

Covered Call Risk (Real Estate Fund) — The Fund may write (i.e., sell) covered call options, a type of derivative instrument. A covered call option is an option in which the Fund, in return for a premium, gives another party a right to buy specified securities owned by the Fund at a specified future date and price set at the time of the contract. Covered call risk is the risk that the issuer of the call option will forgo any profit from increases in the market value of the underlying security covering the call option above the sum of the premium and the strike price of the call but retain the risk of loss if the underlying security declines in value. The Fund will have no control over the exercise of the option by the option holder and may lose the benefit from any capital appreciation on the underlying security. A number of factors may influence the option holder's decision to exercise the option, including the value of the underlying security, price volatility, dividend yield and interest rates. To the extent that these factors increase the value of the call option, the option holder is more likely to exercise the option, which may negatively affect the Fund.

Derivatives Risk (Long/Short Equity Fund and U.S. All Cap Index Fund) — The Funds' use of options and swaps is subject to derivatives risk. Derivatives are often more volatile than other investments and may magnify the Fund's gains or losses. There are various factors that affect the Fund's ability to achieve its objective with derivatives. Successful use of a derivative depends upon the degree to which prices of the underlying assets correlate with price movements in the derivatives the Fund buys or sells. The Fund could be negatively affected if the change in market value of its securities fails to correlate perfectly with the values of the derivatives it purchased or sold. The lack of a liquid secondary market for a derivative may prevent the Fund from closing its derivative positions and could adversely impact its ability to achieve its objective and to realize profits or limit losses. Since derivatives may be purchased for a fraction of their value, a relatively small price movement in a derivative may result in an immediate and substantial loss or gain to the Fund. Derivatives are often more volatile than other investments and the Fund may lose more in a derivative than it originally invested in it. Additionally, some derivative instruments are subject to counterparty risk, meaning that the party that issues the derivative may experience a significant credit event and may be unwilling or unable to make timely settlement payments or otherwise honor its obligations. Moreover, regulation relating to the Fund's use of derivatives and related instruments, including Rule 18f-4 under the Investment Company Act of 1940, as amended (the "1940 Act"), could potentially limit or impact the Fund's ability to invest in derivatives, limit the Fund's ability to employ certain strategies that use derivatives and/or adversely affect the value of derivatives and the Fund's performance.

Options. Options involve the payment or receipt of a premium by the investor and the corresponding right or obligation, as the case may be, to either purchase or sell the underlying security for a specific price at a certain time or during a certain period. Purchasing options involves the risk that the underlying instrument will not change price in the manner expected, so that the investor loses its premium. Selling options involves potentially greater risk because the investor is exposed to the extent of the actual price movement in the underlying security rather than only the premium payment received (which could result in a potentially unlimited loss). If the Fund writes a "covered" call option (i.e., a call option on a security in which the Fund holds a long position), the Fund may not participate fully in a rise in market value of the underlying security. Over-the-counter options also involve counterparty solvency risk.

Swaps. In a swap transaction, two parties agree to exchange the returns, differentials in rates of return or some other amount earned or realized on the "notional amount" of predetermined investments or instruments, which may be adjusted for an interest factor. Swaps can involve greater risks than direct investment in securities, because swaps may be leveraged and are subject to counterparty

risk and valuation risk. Swaps may also be classified as illiquid. It may not be possible for the Fund to liquidate a swap position at an advantageous time or price, which may result in significant losses.

Equity Risk (Large Cap Growth Fund, Large Cap Value Fund, Small Cap Fund, International Equity Fund, Long/Short Equity Fund, U.S. All Cap Index Fund and Real Estate Fund) – Equity securities include public and privately issued equity securities, common and preferred stocks, warrants, rights to subscribe to common stock, convertible securities, depositary receipts and shares of real estate investment trusts ("REITs"). Common stock represents an equity or ownership interest in an issuer. Preferred stock provides a fixed dividend that is paid before any dividends are paid to common stockholders, and which takes precedence over common stock in the event of a liquidation. Like common stock, preferred stocks represent partial ownership in a company, although preferred stock shareholders do not enjoy any of the voting rights of common stockholders. Also, unlike common stock, a preferred stock pays a fixed dividend that does not fluctuate, although the company does not have to pay this dividend if it lacks the financial ability to do so. Investments in equity securities in general are subject to market risks that may cause their prices to fluctuate over time, sometimes rapidly or unpredictability. The value of securities convertible into equity securities, such as warrants or convertible debt, is also affected by prevailing interest rates, the credit quality of the issuer and any call provision. Fluctuations in the value of equity securities in which a Fund invests will cause the Fund's net asset value ("NAV") to fluctuate. An investment in a portfolio of equity securities may be more suitable for long-term investors who can bear the risk of these share price fluctuations. Depositary receipts and REITs are discussed elsewhere in this section.

Fixed Income Risk (Limited Duration Fund and Core Bond Fund) – The market values of fixed income investments change in response to interest rate changes and other factors. Interest rates may change as a result of a variety of factors, and the change may be sudden and significant, with unpredictable impacts on the financial markets and a Fund's investments. During periods of rising interest rates, the values of outstanding fixed income securities generally decrease. Moreover, while securities with longer maturities tend to produce higher yields, the prices of longer maturity securities are also subject to greater market value fluctuations as a result of changes in interest rates. During periods of falling interest rates, certain debt obligations with high interest rates may be prepaid (or "called") by the issuer prior to maturity, and during periods of rising interest rates, certain debt obligations with low interest rates may be extended beyond maturity. A rise in interest rates may also increase volatility and reduce liquidity in the fixed income markets, and result in a decline in the value of the fixed income investments held by the Funds. In addition, reductions in dealer market-making capacity as a result of structural or regulatory changes could further decrease liquidity and/or increase volatility in the fixed income markets. As a result of these market conditions, a Fund's value may fluctuate and/or a Fund may experience increased redemptions from shareholders, which may impact a Fund's liquidity or force a Fund to sell securities at reduced prices or under unfavorable conditions, therefore reducing the value of the Fund. Very low or negative interest rates may prevent a Fund from generating positive returns and may increase the risk that if followed by rising interest rates the Fund's performance will be negatively impacted.

In addition to these risks, fixed income securities may be subject to credit risk, which is the possibility that an issuer will be unable or unwilling to make timely payments of either principal or interest.

Foreign/Emerging Markets Securities Risk (International Equity Fund) - Investments in securities of foreign companies (including direct investments as well as investments through depositary receipts) can be more volatile than investments in U.S. companies. Diplomatic, political, or economic developments, including nationalization or appropriation, could affect investments in foreign companies. Foreign securities markets generally have less trading volume and less liquidity than U.S. markets. In addition, the value of securities denominated in foreign currencies, and of dividends from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Financial statements of foreign issuers are governed by different accounting, auditing, and financial reporting standards than the financial statements of U.S. issuers and may be less transparent and uniform than in the United States. Thus, there may be less information publicly available about foreign issuers than about most U.S. issuers. Transaction costs are generally higher than those in the United States and expenses for custodial arrangements of foreign securities may be somewhat greater than typical expenses for custodial arrangements of similar U.S. securities. Some foreign governments levy withholding taxes against dividend and interest income. Although in some countries a portion of these taxes are recoverable, the non-recovered portion will reduce the income received from the securities comprising the Fund's portfolio. Additionally, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may result in the Fund having to sell such prohibited securities at inopportune times. Such prohibited securities may have less liquidity as a result of such U.S. Government designation and the market price of such prohibited securities may decline, which may cause the Fund to incur losses. These risks may be heightened with respect to emerging market countries since political turmoil and rapid changes in economic conditions are more likely to occur in these countries.

The Fund may invest in unsponsored American Depositary Receipts ("ADRs"), which are issued by one or more depositaries without a formal agreement with the company that issues the underlying securities. Holders of unsponsored ADRs generally bear all the costs thereof, and the depositaries of unsponsored ADRs frequently are under no obligation to distribute shareholder communications received from the issuers of the underlying securities or to pass through voting rights with respect to the underlying securities. In addition, the issuers of the securities underlying unsponsored ADRs are not obligated to disclose material information in the United States and, therefore, there may be less information available regarding such issuers and there may not be a correlation between such information and the market value of the ADRs.

High Yield Bond Risk (Limited Duration Fund and Core Bond Fund) – High yield, or "junk," bonds are highly speculative securities that are usually issued by smaller, less creditworthy and/or highly leveraged (indebted) companies. Compared with investment-grade bonds, high yield bonds are considered to carry a greater degree of risk and are considered to be less likely to make payments of interest and principal. In particular, lower-quality high yield bonds (rated CCC, CC, C, or unrated securities judged to be of comparable quality) are subject to a greater degree of credit risk than higher-quality high yield bonds and may be near default. High yield bonds rated D are in default. Market developments and the financial and business conditions of the issuers of these securities generally influence their price and liquidity more than changes in interest rates, when compared to investment-grade debt securities.

Indexing Strategy/Index Tracking Risk (U.S. All Cap Index Fund) – The Fund is managed with an indexing investment strategy, attempting to track the performance of an unmanaged index of securities. The Fund will seek to replicate the Knights of Columbus U.S. All Cap Index® (the "Index") returns, regardless of the current or projected performance of the Index or of the actual securities comprising the Index. This differs from an actively-managed fund, which typically seeks to outperform a benchmark index. The Fund generally will buy and will not sell a security included in the Index as long as the security is part of the Index regardless of any sudden or material decline in value or foreseeable material decline in value of the security, even though the Sub-Adviser may make a different investment decision for other actively managed accounts or portfolios that hold the security. As a result, the Fund's performance may be less favorable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility, and risk of the Index (in absolute terms and by comparison with other indices) and, consequently, the performance, volatility, and risk of the Fund. While the Sub-Adviser seeks to track the performance of the Index (i.e., achieve a high degree of correlation with the Index), the Fund's return may not match or achieve a high degree of correlation with the return of the Index. The Fund incurs a number of operating expenses not applicable to the Index, and incurs costs in buying and selling securities. In addition, the Fund may not be fully invested at times, either as a result of cash flows into or out of the Fund or reserves of cash held by the Fund to meet redemptions. Changes in the composition of the Index and regulatory requirements also may impact the Fund's ability to match the return of the Index. Index tracking risk may be heightened during times of increased market volatility or other unusual market conditions.

Information Technology Sector Risk (Large Cap Growth Fund) — Information technology companies face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. Like other technology companies, information technology companies may have limited product lines, markets, financial resources or personnel. The products of information technology companies may face product obsolescence due to rapid technological developments and frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. Technology companies and companies that rely heavily on technology, especially those of smaller, less-seasoned companies, tend to be more volatile than the overall market. Companies in the information technology sector are heavily dependent on patent and intellectual property rights. The loss or impairment of these rights may adversely affect the profitability of these companies. Finally, while all companies may be susceptible to network security breaches, certain companies in the information technology sector may be particular targets of hacking and potential theft of proprietary or consumer information or disruptions in service, which could have a material adverse effect on their businesses.

Large Purchase and Redemption Risk (All Funds) – Large purchases or redemptions of a Fund's shares may affect such Fund, since the Fund may be required to sell portfolio securities if it experiences redemptions, and the Fund will need to invest additional cash that it receives. While it is impossible to predict the overall impact of these transactions over time, there could be adverse effects on Fund management or performance to the extent a Fund may be required to sell securities or invest cash at times when it would not otherwise do so. These transactions could also have tax consequences if sales of securities result in gains, and could also increase transaction costs or portfolio turnover. The investment managers are committed to minimizing the impact of such transactions on a Fund, and may seek to effect the transactions in-kind, to the extent consistent with pursuing the investment objective of such Fund.

Market Risk (All Funds) — The risk that the market value of an investment may move up and down, sometimes rapidly and unpredictably. A Fund's NAV per share will fluctuate with the market prices of its portfolio securities. Market risk may affect a single issuer, an industry, a sector or the equity or bond market as a whole. Markets for securities in which the Fund invests may decline significantly in response to adverse issuer, political, social, regulatory, market, economic or other developments that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment or publicity. Similarly, the impact of any public health emergencies (such as the spread of infectious diseases, epidemics, and pandemics), natural disasters and other similar events, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which a Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund. Recent examples include pandemic risks related to COVID-19 and aggressive measures taken worldwide in response by governments, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines of large populations, and by businesses, including changes to operations and reducing staff. Additionally, governmental authorities and regulators are responding to the COVID-19 pandemic with significant fiscal and monetary policy changes, including by providing direct capital infusions into companies, introducing new monetary programs and considerably lowering interest rates, which, in some cases resulted in, and may in the future result in, negative interest rates. These actions, including their possible unexpected or sudden discontinuance, reversal or potential ineffectiveness (including if the actions are perceived by investors as unlikely to achieve the desired results), could further increase volatility in securities and other financial markets, reduce

market liquidity, heighten investor uncertainty and adversely affect the value of a Fund's investments and the performance of the Fund. The impact of the COVID-19 pandemic may be short term or may last for an extended period of time, and in either case could result in a substantial economic downturn or recession.

Mortgage-Backed and Asset-Backed Securities Risk (Limited Duration Fund and Core Bond Fund) — Mortgage-backed securities are fixed income securities representing an interest in a pool of underlying mortgage loans. Mortgage-backed securities are sensitive to changes in interest rates, but may respond to these changes differently from other fixed income securities due to the possibility of prepayment of the underlying mortgage loans. As a result, it may not be possible to determine in advance the actual maturity date or average life of a mortgage-backed security. Rising interest rates tend to discourage re-financings, with the result that the average life and volatility of the security will increase, exacerbating its decrease in market price. When interest rates fall, however, mortgage-backed securities may not gain as much in market value because of the expectation of additional mortgage prepayments, which must be reinvested at lower interest rates.

Asset-backed securities are securities backed by non-mortgage assets such as company receivables, truck and auto loans, leases and credit card receivables. Asset-backed securities may be issued as pass-through certificates, which represent undivided fractional ownership interests in the underlying pools of assets. Therefore, repayment depends largely on the cash flows generated by the assets backing the securities. Asset-backed securities entail prepayment risk, which may vary depending on the type of asset, but is generally less than the prepayment risk associated with mortgage-backed securities. Asset-backed securities present credit risks that are not presented by mortgage-backed securities because asset-backed securities generally do not have the benefit of a security interest in collateral that is comparable in quality to mortgage assets. If the issuer of an asset-backed security defaults on its payment obligations, there is the possibility that, in some cases, a Fund will be unable to possess and sell the underlying collateral and that the Fund's recoveries on repossessed collateral may not be available to support payments on the security. In the event of a default, a Fund may suffer a loss if it cannot sell collateral quickly and receive the amount it is owed.

Municipal Bonds Risk (Limited Duration Fund and Core Bond Fund) — Municipal bonds are fixed income securities issued by state or local governments or their agencies to finance capital expenditures and operations. The obligation to pay principal and interest on municipal bonds may be a general obligation of the state or local government or may be supported only by an agency or a particular source of revenues. Therefore, municipal bonds vary in credit quality. Municipal bonds, like other fixed income securities, rise and fall in value in response to economic and market factors, primarily changes in interest rates, and actual or perceived credit quality. State and local governments rely on taxes and, to some extent, revenues from private projects financed by municipal bonds, to pay interest and principal on municipal bonds. Poor statewide or local economic results or changing political sentiments may reduce tax revenues and increase the expenses of municipal issuers, making it more difficult for them to meet their obligations. Also, there may be economic or political changes that impact the ability of issuers of municipal bonds to repay principal and to make interest payments. Any changes in the financial condition of municipal issuers may also adversely affect the value of a Fund's securities.

Non-Diversified Risk (Large Cap Growth Fund) — The Fund is non-diversified, which means that it may invest in the securities of relatively few issuers. As a result, the Fund may be more susceptible to a single adverse economic or political occurrence affecting one or more of these issuers and may experience increased volatility due to its investments in those securities.

Quantitative Investing Risk (Large Cap Value Fund, Large Cap Growth Fund, Small Cap Fund and International Equity Fund) — There is no guarantee that the use of quantitative models, algorithms, methods or other similar techniques, and the investments selected based on such techniques, will perform as expected, produce the desired results or enable a Fund to achieve its investment objective. A Fund may be adversely affected by imperfections, errors or limitations in construction and implementation (for example, limitations in a model, proprietary or third-party data imprecision or unavailability, software or other technology malfunctions, or programming inaccuracies) and the Adviser's ability to monitor and timely adjust the metrics or update the data or features underlying the model, algorithm or other similar analytical tools ("quantitative tools"). A Fund may also be adversely affected by the Adviser's ability to make accurate qualitative judgments regarding the quantitative tools' output or operational complications relating to any quantitative tool. Thus, a Fund is subject to the risk that any quantitative tools used by the Adviser will not be successful as to, for example, selecting or weighting investment positions, and that these tools may not perform as expected.

Real Estate Investment Trusts Risk (U.S. All Cap Index Fund and Real Estate Fund) — REITs are pooled investment vehicles that own, and usually operate, income-producing real estate. REITs are susceptible to the risks associated with direct ownership of real estate, as discussed elsewhere in this section. REITs typically incur fees that are separate from those of the Fund. Accordingly, the Fund's investments in REITs will result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the REITs' operating expenses, in addition to paying Fund expenses. REIT operating expenses are not reflected in the fee table and example in this prospectus.

Some REITs may have limited diversification and may be subject to risks inherent in financing a limited number of properties. REITs depend generally on their ability to generate cash flow to make distributions, and may be subject to defaults by borrowers and to self-liquidations. In addition, a REIT may be affected by its failure to qualify for tax-free pass-through of income under the Internal Revenue Code of 1986, as amended (the "Code"), or its failure to maintain exemption from registration under the 1940 Act.

Real Estate Sector Risk (Real Estate Fund) — Securities of companies principally engaged in the real estate sector may be subject to the risks associated with the direct ownership of real estate. Risks commonly associated with the direct ownership of real estate include (i) changes in general economic and market conditions; (ii) changes in the value of real estate properties; (iii) risks related to local economic conditions, overbuilding and increased competition; (iv) increases in property taxes and operating expenses; (v) changes in zoning laws; (vi) casualty and condemnation losses; (vii) variations in rental income, neighborhood values or the appeal of property to tenants; (viii) the availability of financing; and (ix) changes in interest rates and quality of credit extended. In addition, the performance of the economy in each of the regions and countries in which the real estate owned by a company is located affects occupancy, market rental rates and expenses and, consequently, has an impact on the income from such properties and their underlying values. In addition to these risks, some REITs and real estate operating companies ("REOCs") have limited diversification because they invest in a limited number of properties, a narrow geographic area, or a single type of property. Moreover, certain real estate investments may be illiquid and, therefore, the ability of REITs and REOCs to reposition their portfolios promptly in response to changes in economic or other conditions is limited. These factors may increase the volatility of the Fund's investments in REITs or REOCs.

Short Sales Risk (Long/Short Equity Fund) — The Fund is subject to short sales risk. Short sales are transactions in which the Fund sells a security it does not own. The Fund must borrow the security to make delivery to the buyer. The Fund is then obligated to replace the security borrowed by purchasing the security at the market price at the time of replacement. The price at such time may be higher or lower than the price at which the security was sold by the Fund. If the underlying security goes down in price between the time the Fund sells the security and buys it back, the Fund will realize a gain on the transaction. Conversely, if the underlying security goes up in price during the period, the Fund will realize a loss on the transaction. Because the market price of the security sold short could increase without limit, the Fund could be subject to a theoretically unlimited loss. The risk of such price increases is the principal risk of engaging in short sales. Reinvesting proceeds received from short selling may create leverage. These transactions may expose the Fund to greater risk and increase its costs. As an open-end investment company registered with the SEC, the Fund is subject to the federal securities laws, including the 1940 Act and the rules thereunder. Rule 18f-4 under the 1940 Act requires, among other things, that the Fund either use derivatives in a limited manner or comply with an outer limit on fund leverage risk based on value-at-risk. The use of leverage can amplify the effects of market volatility on the Fund's share price and make the Fund's returns more volatile. This is because leverage tends to exaggerate the effect of any increase or decrease in the value of the Fund's portfolio securities. The use of leverage may also cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations.

In addition, the Fund's investment performance may suffer if the Fund is required to close out a short position earlier than it had intended. This would occur if the securities lender required the Fund to deliver the securities the Fund borrowed at the commencement of the short sale and the Fund was unable to borrow the securities from another securities lender or otherwise obtain the security by other means. Moreover, the Fund may be subject to expenses related to short sales that are not typically associated with investing in securities directly, such as costs of borrowing and margin account maintenance costs associated with the Fund's open short positions. These expenses negatively impact the performance of the Fund. For example, when the Fund short sells an equity security that pays a dividend, it is obligated to pay the dividend on the security it has sold. However, a dividend paid on a security sold short generally reduces the market value of the shorted security and thus, increases the Fund's unrealized gain or reduces the Fund's unrealized loss on its short sale transaction. To the extent that the dividend that the Fund is obligated to pay is greater than the return earned by the Fund on investments, the performance of the Fund will be negatively impacted. Furthermore, the Fund may be required to pay a premium or interest to the lender of the security. The foregoing types of short sale expenses are sometimes referred to as the "negative cost of carry," and will tend to cause the Fund to lose money on a short sale even in instances where the price of the underlying security sold short does not change over the duration of the short sale.

The foregoing is not intended to be a complete discussion of the risks associated with investing in the Funds. A more complete description of risks associated with the Funds is included in the prospectus and statement of additional information.

11. In-Kind Transactions:

During the year ended October 31, 2023, there were no in-kind transactions for the Funds. During the year ended October 31, 2022, the Limited Duration Fund redeemed shares of beneficial interest in exchange for securities and cash. The securities were redeemed at their current value on the date of the transaction.

| Transaction | Shares | | Investment | | | Realized Gains |
|-------------|-----------|-----------|---------------------|------------------|--------------|----------------|
| Date | Redeemed | Cash | Securities at Value | Interest Accrued | Total | (Losses) |
| 4/29/2022 | 1,595,855 | \$578,615 | \$14,756,218 | \$65,167 | \$15,400,000 | \$(548,748) |

12. Concentrations of Shareholders:

At October 31, 2023, the percentage of total shares outstanding held by shareholders for each Fund, which are comprised of affiliated omnibus accounts, unless otherwise indicated, that are held on behalf of various individual shareholders, was as follows:

| | No. of | | No. of | |
|---------------------------|--------------|-------------|----------------|-------------|
| | Shareholders | | Shareholders | |
| | I Shares | % Ownership | Class S Shares | % Ownership |
| Limited Duration Fund | 3 | 50% | 2 | 90% |
| Core Bond Fund | 2 | 43% | 1 | 91% |
| Long/Short Equity Fund | 2 | 66% | _ | _ |
| Large Cap Value Fund | 2 | 47% | 2 | 96% |
| Large Cap Growth Fund | 2 | 51% | 1 | 96% |
| Small Cap Fund | 2 | 62% | 3 | 100% |
| U.S. All Cap Index Fund | 4 | 66% | _ | _ |
| Real Estate Fund | 2 | 81% | _ | _ |
| International Equity Fund | 2 | 55% | 3 | 86% |

13. Indemnifications:

In the normal course of business, the Funds enter into contracts that provide general indemnifications. The Funds' maximum exposure under these arrangements is dependent on future claims that may be made against the Funds and, therefore, cannot be established; however, based on experience, the risk of loss from such claims is considered remote.

14. Subsequent Events:

The Funds have been evaluated by management regarding the need for additional disclosures and/or adjustments resulting from subsequent events. Based on this evaluation, no additional adjustments were required to the financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Trustees of The Advisors' Inner Circle Fund III and Shareholders of Knights of Columbus Limited Duration Fund, Knights of Columbus Core Bond Fund, Knights of Columbus Long/Short Equity Fund, Knights of Columbus Large Cap Value Fund, Knights of Columbus Large Cap Growth Fund, Knights of Columbus Small Cap Fund, Knights of Columbus U.S. All Cap Index Fund, Knights of Columbus Real Estate Fund, and Knights of Columbus International Equity Fund

Opinions on the Financial Statements

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of Knights of Columbus Limited Duration Fund, Knights of Columbus Core Bond Fund, Knights of Columbus Long/Short Equity Fund, Knights of Columbus Large Cap Value Fund, Knights of Columbus Large Cap Growth Fund, Knights of Columbus Small Cap Fund, Knights of Columbus U.S. All Cap Index Fund, Knights of Columbus Real Estate Fund, and Knights of Columbus International Equity Fund (nine of the Funds constituting The Advisors' Inner Circle Fund III, hereafter collectively referred to as the "Funds") as of October 31, 2023, the related statements of operations for the year ended October 31, 2023, the statements of changes in net assets for each of the two years in the period ended October 31, 2023, including the related notes, and the financial highlights for each of the periods indicated therein (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of October 31, 2023, the results of each of their operations for the year then ended, the changes in each of their net assets for each of the two years in the period ended October 31, 2023 and each of the financial highlights for each of the periods indicated therein, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinions

These financial statements are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of October 31, 2023 by correspondence with the custodian and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

/s/ PricewaterhouseCoopers LLP Philadelphia, Pennsylvania

December 28, 2023

We have served as the auditor of one or more investment companies in Knights of Columbus Asset Advisors LLC since 2015.

Set forth below are the names, years of birth, positions with the Trust, length of term of office, and the principal occupations for the last five years of each of the persons currently serving as Trustees and Officers of the Trust. Unless otherwise noted, the business address of each Trustee is SEI Investments Company, One Freedom Valley Drive, Oaks, Pennsylvania 19456. Trustees who are deemed not to be "interested persons" of the Trust are referred to as "Independent Board Members." Mr. Doran is a Trustee who may be deemed to be "interested" person of the Trust as that term is defined in the 1940 Act by virtue of their affiliation with the Trust's Distributor. The Trust's Statement of Additional Information ("SAI") includes additional information about the Trustees and Officers. The SAI may be obtained without charge by calling 1-844-523-8637. The following chart lists Trustees and Officers as of October 31, 2023.

| Name and Year of Birth | Position with Trust and Length of Time Served ¹ | | Other Directorships Held in the Past Five Years² |

DISCLOSURE OF FUND EXPENSES

All mutual funds have operating expenses. As a shareholder of a mutual fund, your investment is affected by these ongoing costs, which include (among others) costs for fund management, administrative services, and shareholder reports like this one. It is important for you to understand the impact of these costs on your investment returns.

Operating expenses such as these are deducted from a mutual fund's gross income and directly reduce your investment return. These expenses are expressed as a percentage of a mutual fund's average net assets; this percentage is known as a mutual fund's expense ratio.

The following examples use the expense ratio and are intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with those of other mutual funds. The examples are based on an investment of \$1,000 made at the beginning of the period shown and held for the entire period (May 1, 2023 to October 31, 2023).

The table on the next page illustrates your Fund's costs in two ways:

• Actual Fund Return. This section helps you to estimate the actual expenses after fee waivers that your Fund incurred over the six month period. The "Expenses Paid During Period" column shows the actual dollar expense cost incurred by a \$1,000 investment in the Fund, and the "Ending Account Value" number is derived from deducting that expense cost from the Fund's gross investment return.

You can use this information, together with the actual amount you invested in the Fund, to estimate the expenses you paid over that six month period. Simply divide your actual starting account value by \$1,000 to arrive at a ratio (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply that ratio by the number shown for your Fund under "Expenses Paid During Period."

• Hypothetical 5% Return. This section helps you compare your Fund's costs with those of other mutual funds. It assumes that the Fund had an annual 5% return before expenses during the year, but that the expense ratio (Column 3) for the period is unchanged. This example is useful in making comparisons because the Securities and Exchange Commission requires all mutual funds to make this 5% calculation. You can assess your Fund's comparative cost by comparing the hypothetical result for your Fund in the "Expenses Paid During Period" column with those that appear in the same charts in the shareholder reports for other mutual funds.

NOTE: Because the hypothetical return is set at 5% for comparison purposes — NOT your Fund's actual return — the account values shown may not apply to your specific investment.

^{*} Expenses are equal to the Fund's annualized expense ratio multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period shown).

[†] The annualized expense ratios include dividend expense incurred during the six-month period. Annualized dividend expense of average net assets totaled 0.50%. Had this expense not been included the ratio would have been 1.50%.

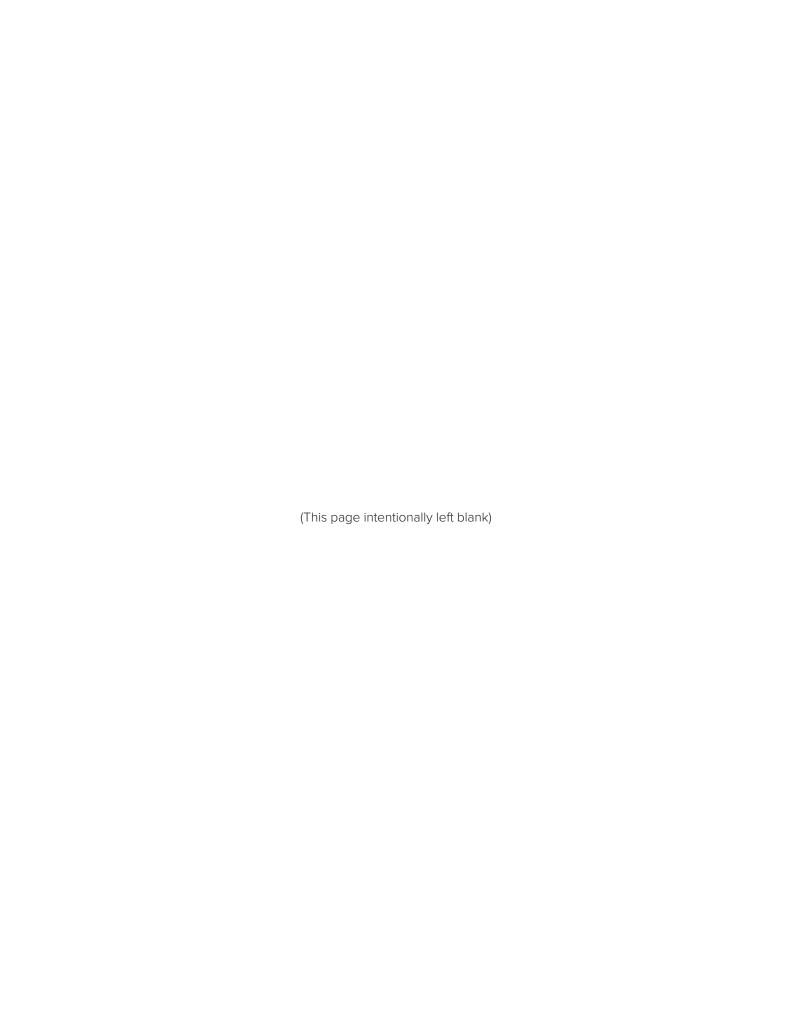

NOTICE TO SHAREHOLDERS (Unaudited)

For shareholders that do not have an October 31, 2023 tax year end, this notice is for informational purposes only. For shareholders with an October 31, 2023 tax year end, please consult your tax advisor as to the pertinence of this notice. For the fiscal year ended October 31, 2023, the Funds are designating the following items with regard to distributions paid during the period.

| | | | | | Dividends | | | | | | |

- (1) Qualifying dividends represent dividends which qualify for the corporate dividends received deduction and is reflected as a percentage of ordinary Income distributions (the total of short term capital gain and net investment income distributions).
- (2) The percentage in this column represents the amount of "Qualifying Dividend Income" as created by the Jobs and Growth Relief Reconciliation Act of 2003 and is reflected as a percentage of ordinary income distributions (the total of short term capital gain and net investment income distributions). It is the intention of each of the aforementioned funds to designate the maximum amount permitted by law.
- (3) U.S. Government Interest represents the amount of interest that was derived from U.S. Government obligations and distributed during the fiscal year. This amount is reflected as a percentage of total ordinary income distributions (the total of short term capital gain and net investment income distributions). Generally, interest from direct U.S. Government obligations is exempt from state income tax. However, for shareholders who are residents of California, Connecticut and New York, the statutory threshold requirements were not satisfied to permit exemption of these amounts from state income.
- (4) The percentage in this column represents the amount of "Qualifying Interest Income" as created by the American Jobs Creation Act of 2004 and is a percentage of ordinary income distributions that are exempt from U.S. withholding tax when paid for foreign investors.
- (5) The percentage in this column represents the amount of "Qualifying Short-Term Capital Gain" as created by the American Jobs Creation Act of 2004 and is reflected as a percentage of short-term capital gain distributions that is exempt from U.S. withholding tax when paid to foreign investors.
- (6) The percentage in this column represents the amount of "Qualifying Foreign Taxes" as a percentage of ordinary distributions during the fiscal year ended October 31, 2023. The Fund intends to pass through a Foreign Tax Credit to shareholders for fiscal year ended 2023. The total amount of foreign source income for the International Equity Fund is \$3,151,768. The total amount of foreign tax paid for the International Equity Fund is \$361,563. Your allocation share of the foreign tax credit will be reported on form 1099-DIV.

The information reported herein may differ from the information and distributions taxable to the shareholders for the calendar year ending December 31, 2023. Complete information will be computed and reported in conjunction with your 2023 Form 1099-DIV.
